Death rates by state fitted by month 1982–2013 against t2m mean : male 15

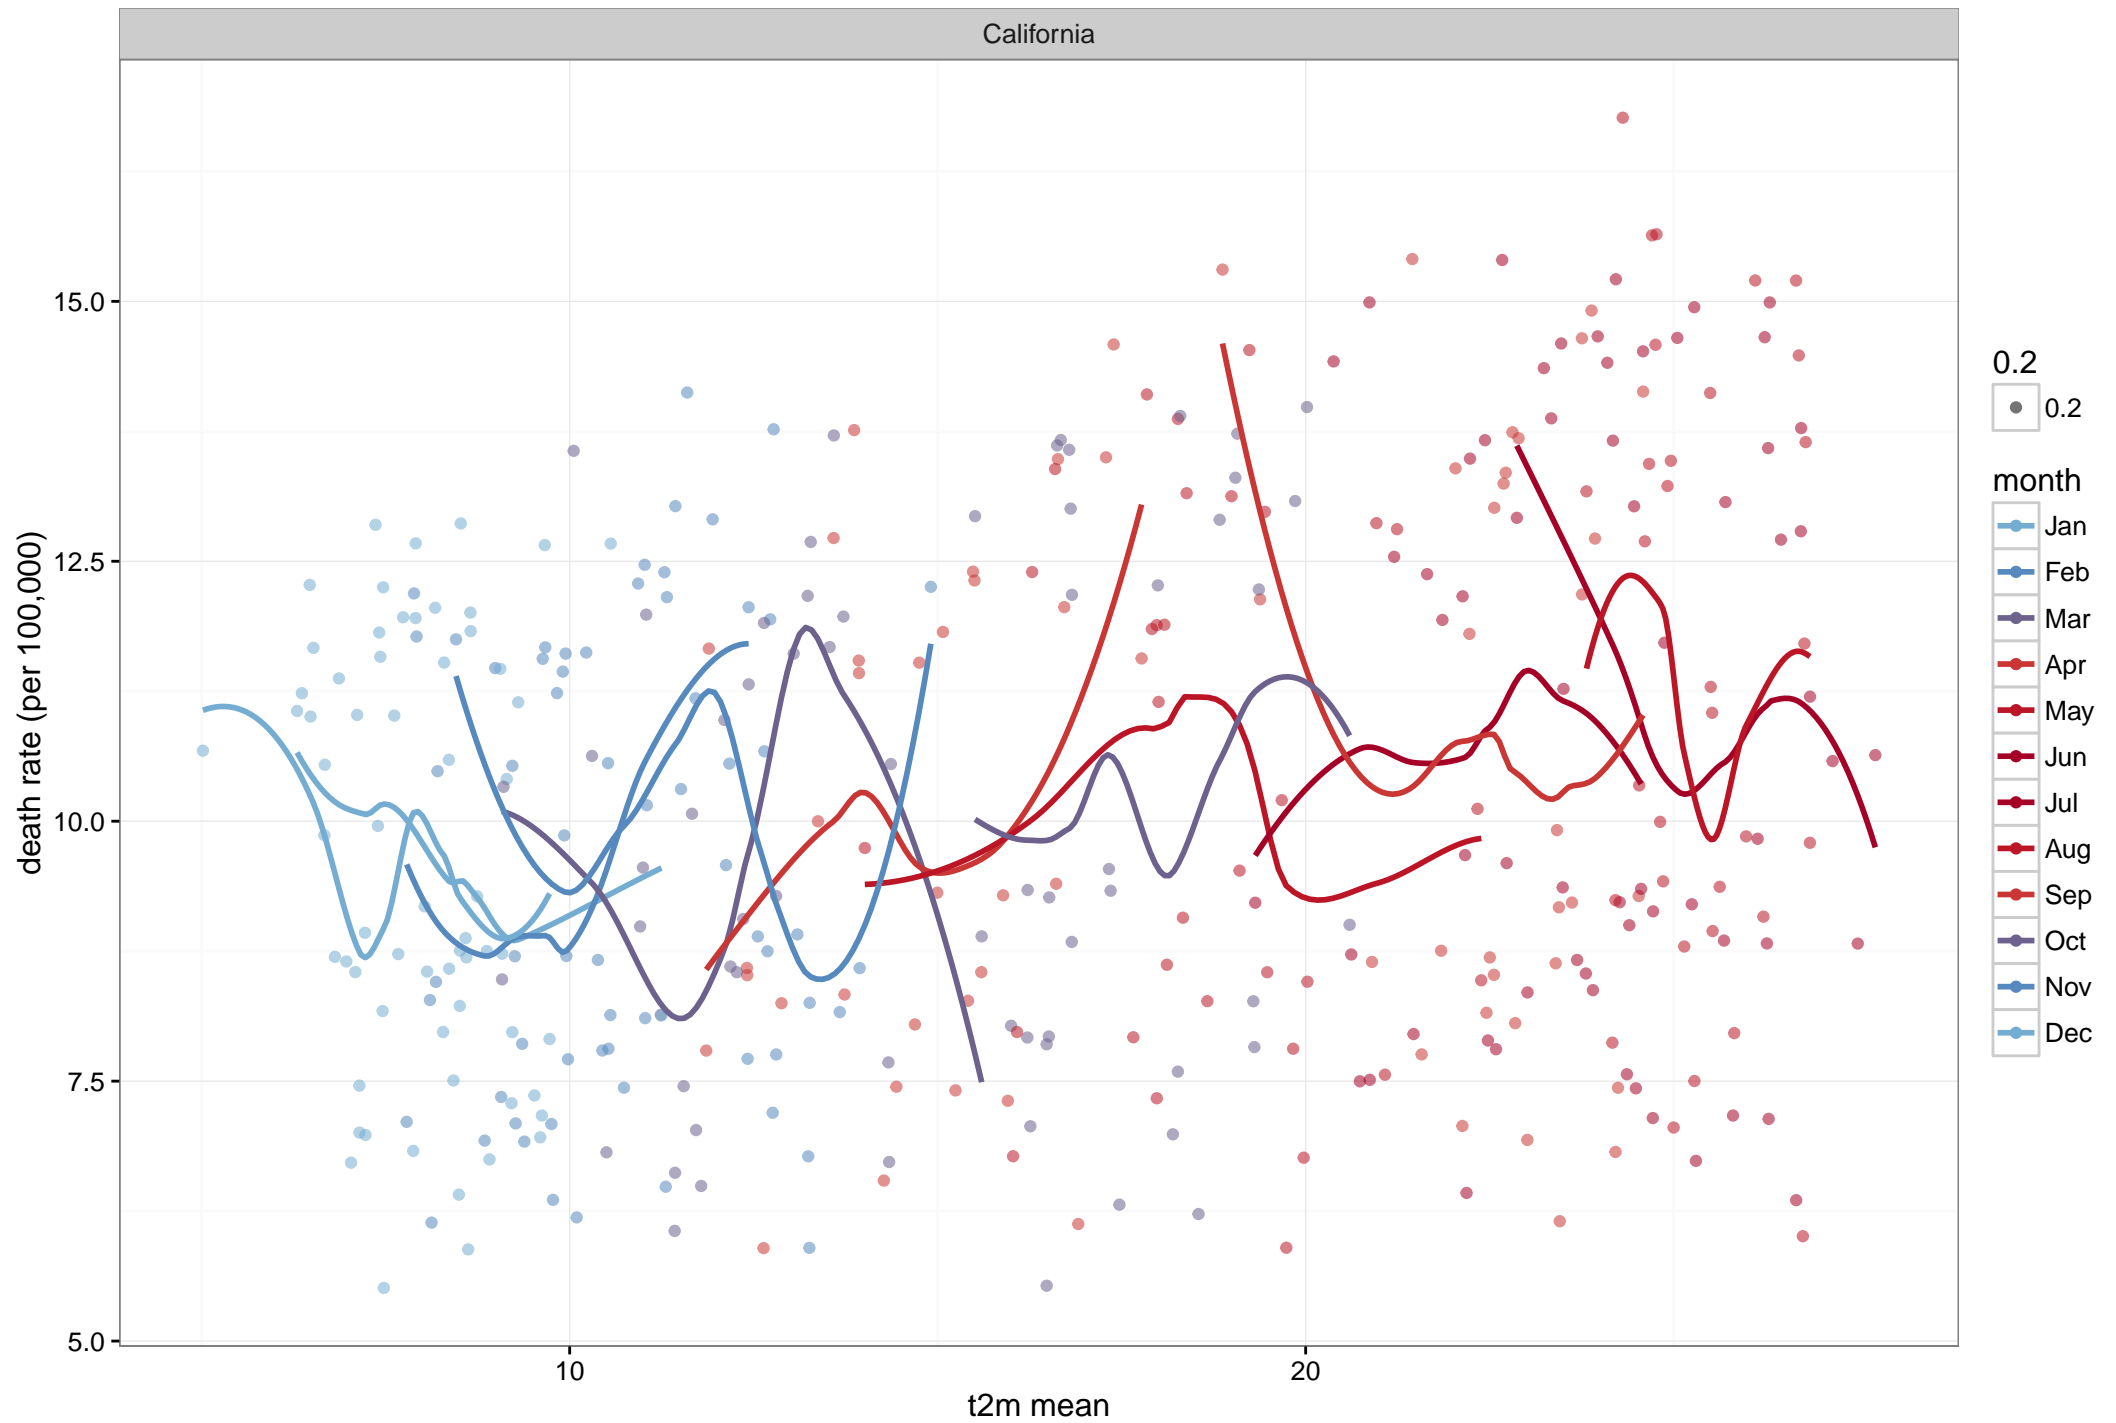

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

The figure is a scatter plot titled "Missouri". The x-axis is labeled "t2m mean" and has major tick marks at 0, 10, 20, and 30. The y-axis is unlabeled. The plot shows three main groups of data points, each with a fitted curve:

- Blue Group:** Data points are concentrated between x=0 and x=10. The fitted curves are smooth, wavy lines in various shades of blue.
- Purple Group:** Data points are concentrated between x=10 and x=15. The fitted curves are smooth, wavy lines in various shades of purple.
- Red Group:** Data points are concentrated between x=15 and x=30. The fitted curves are smooth, wavy lines in various shades of red.

The plot uses a light gray grid for both axes. The data points are small circles, and the fitted curves are solid lines of varying thickness.
