

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

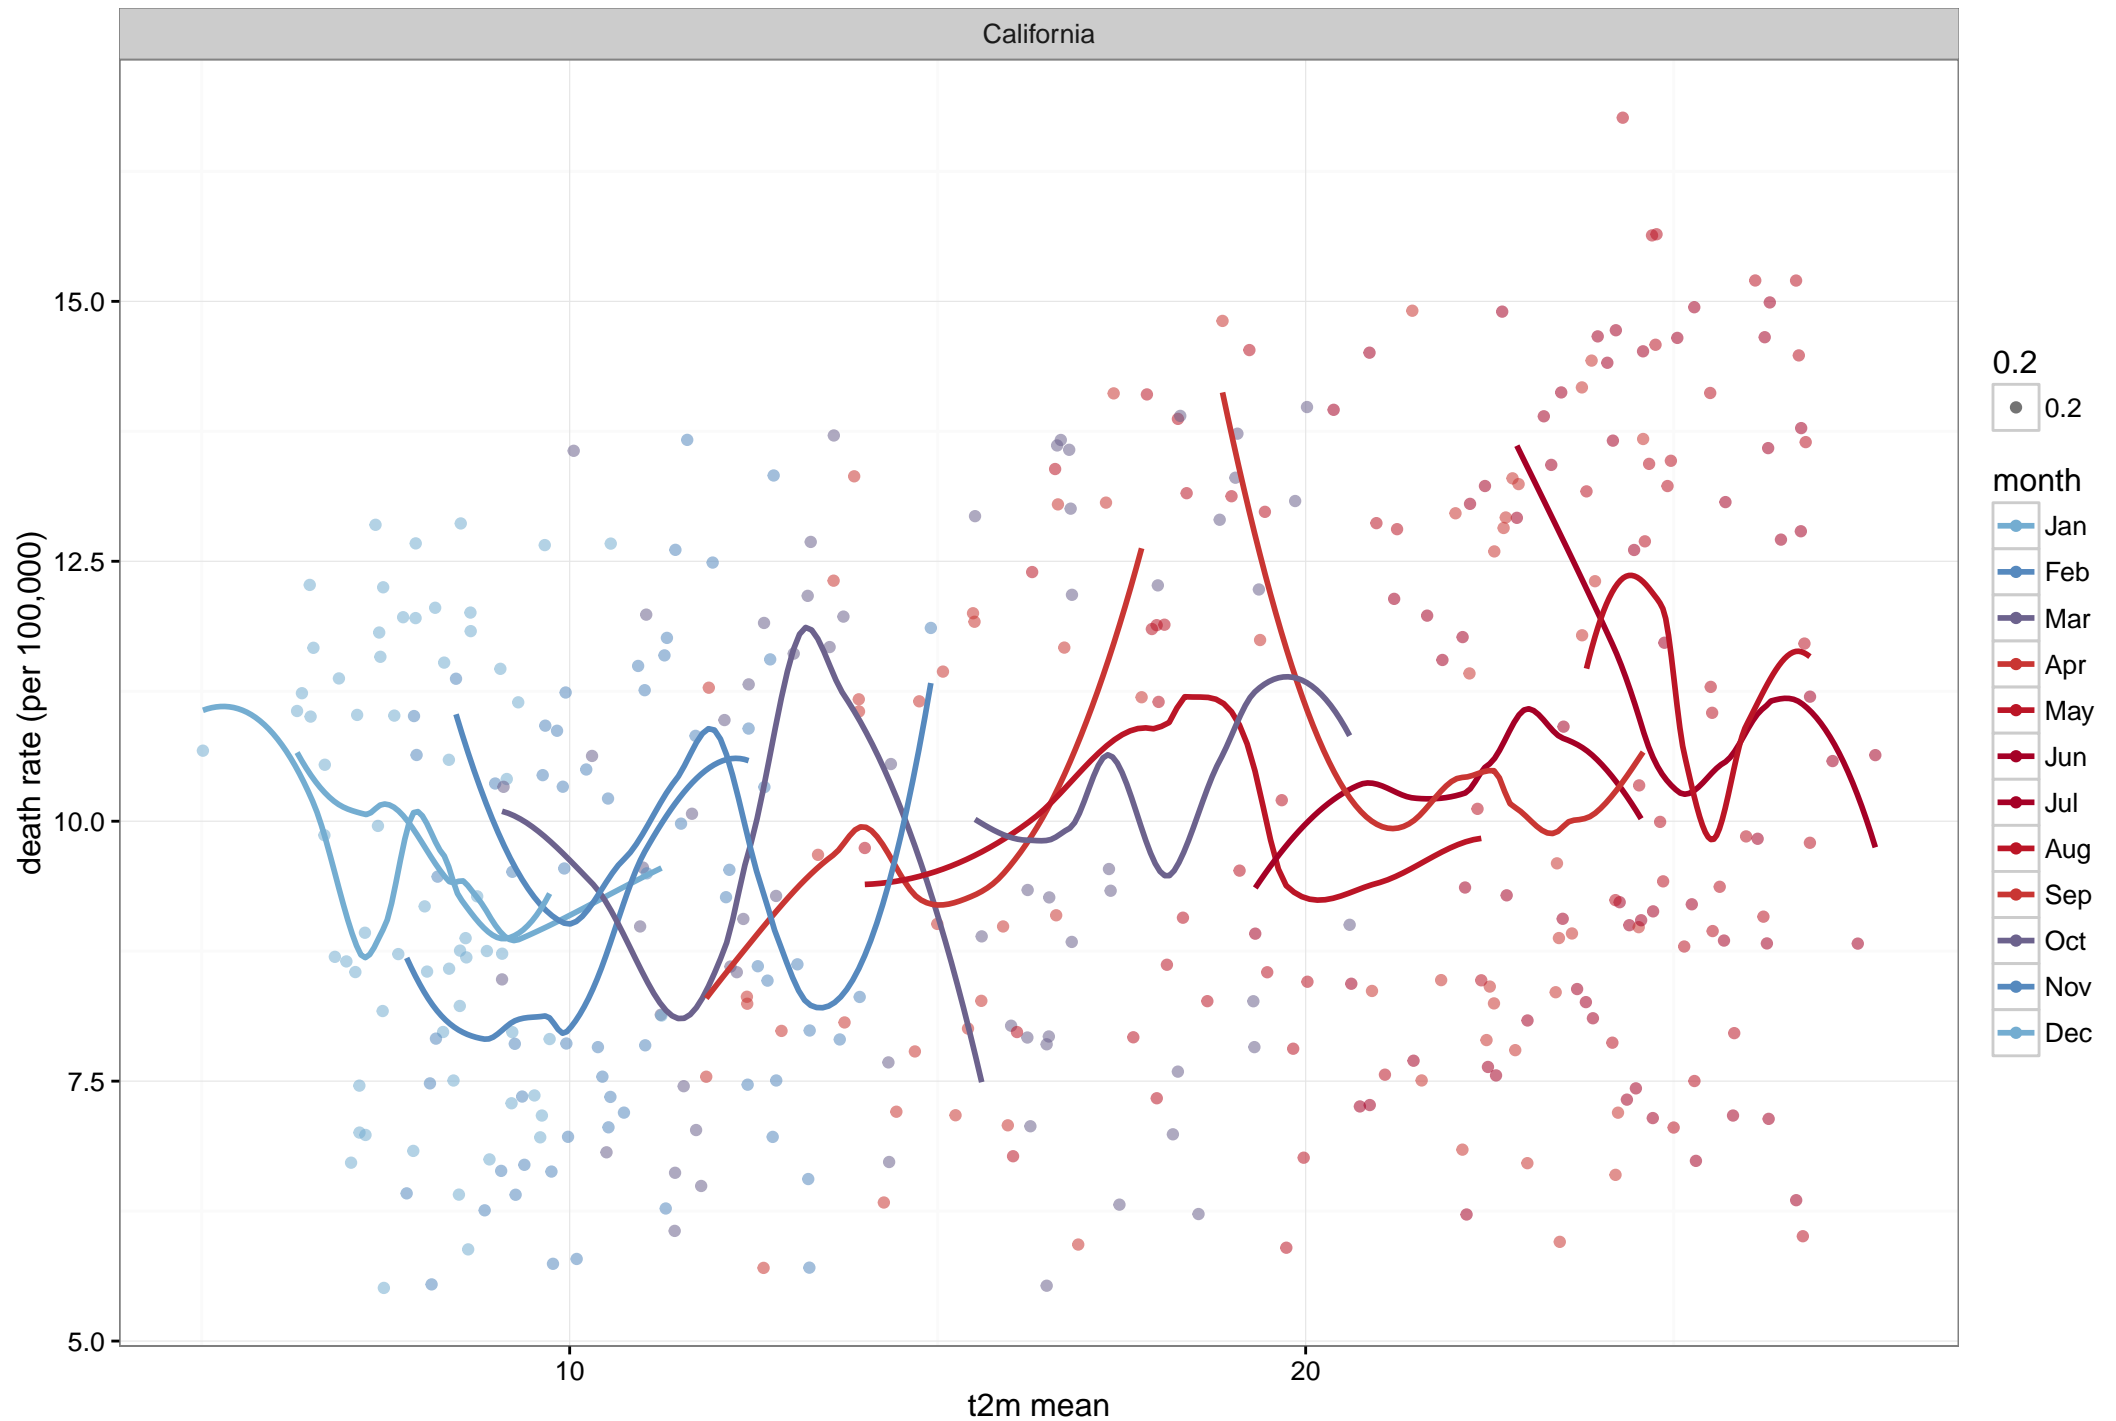

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

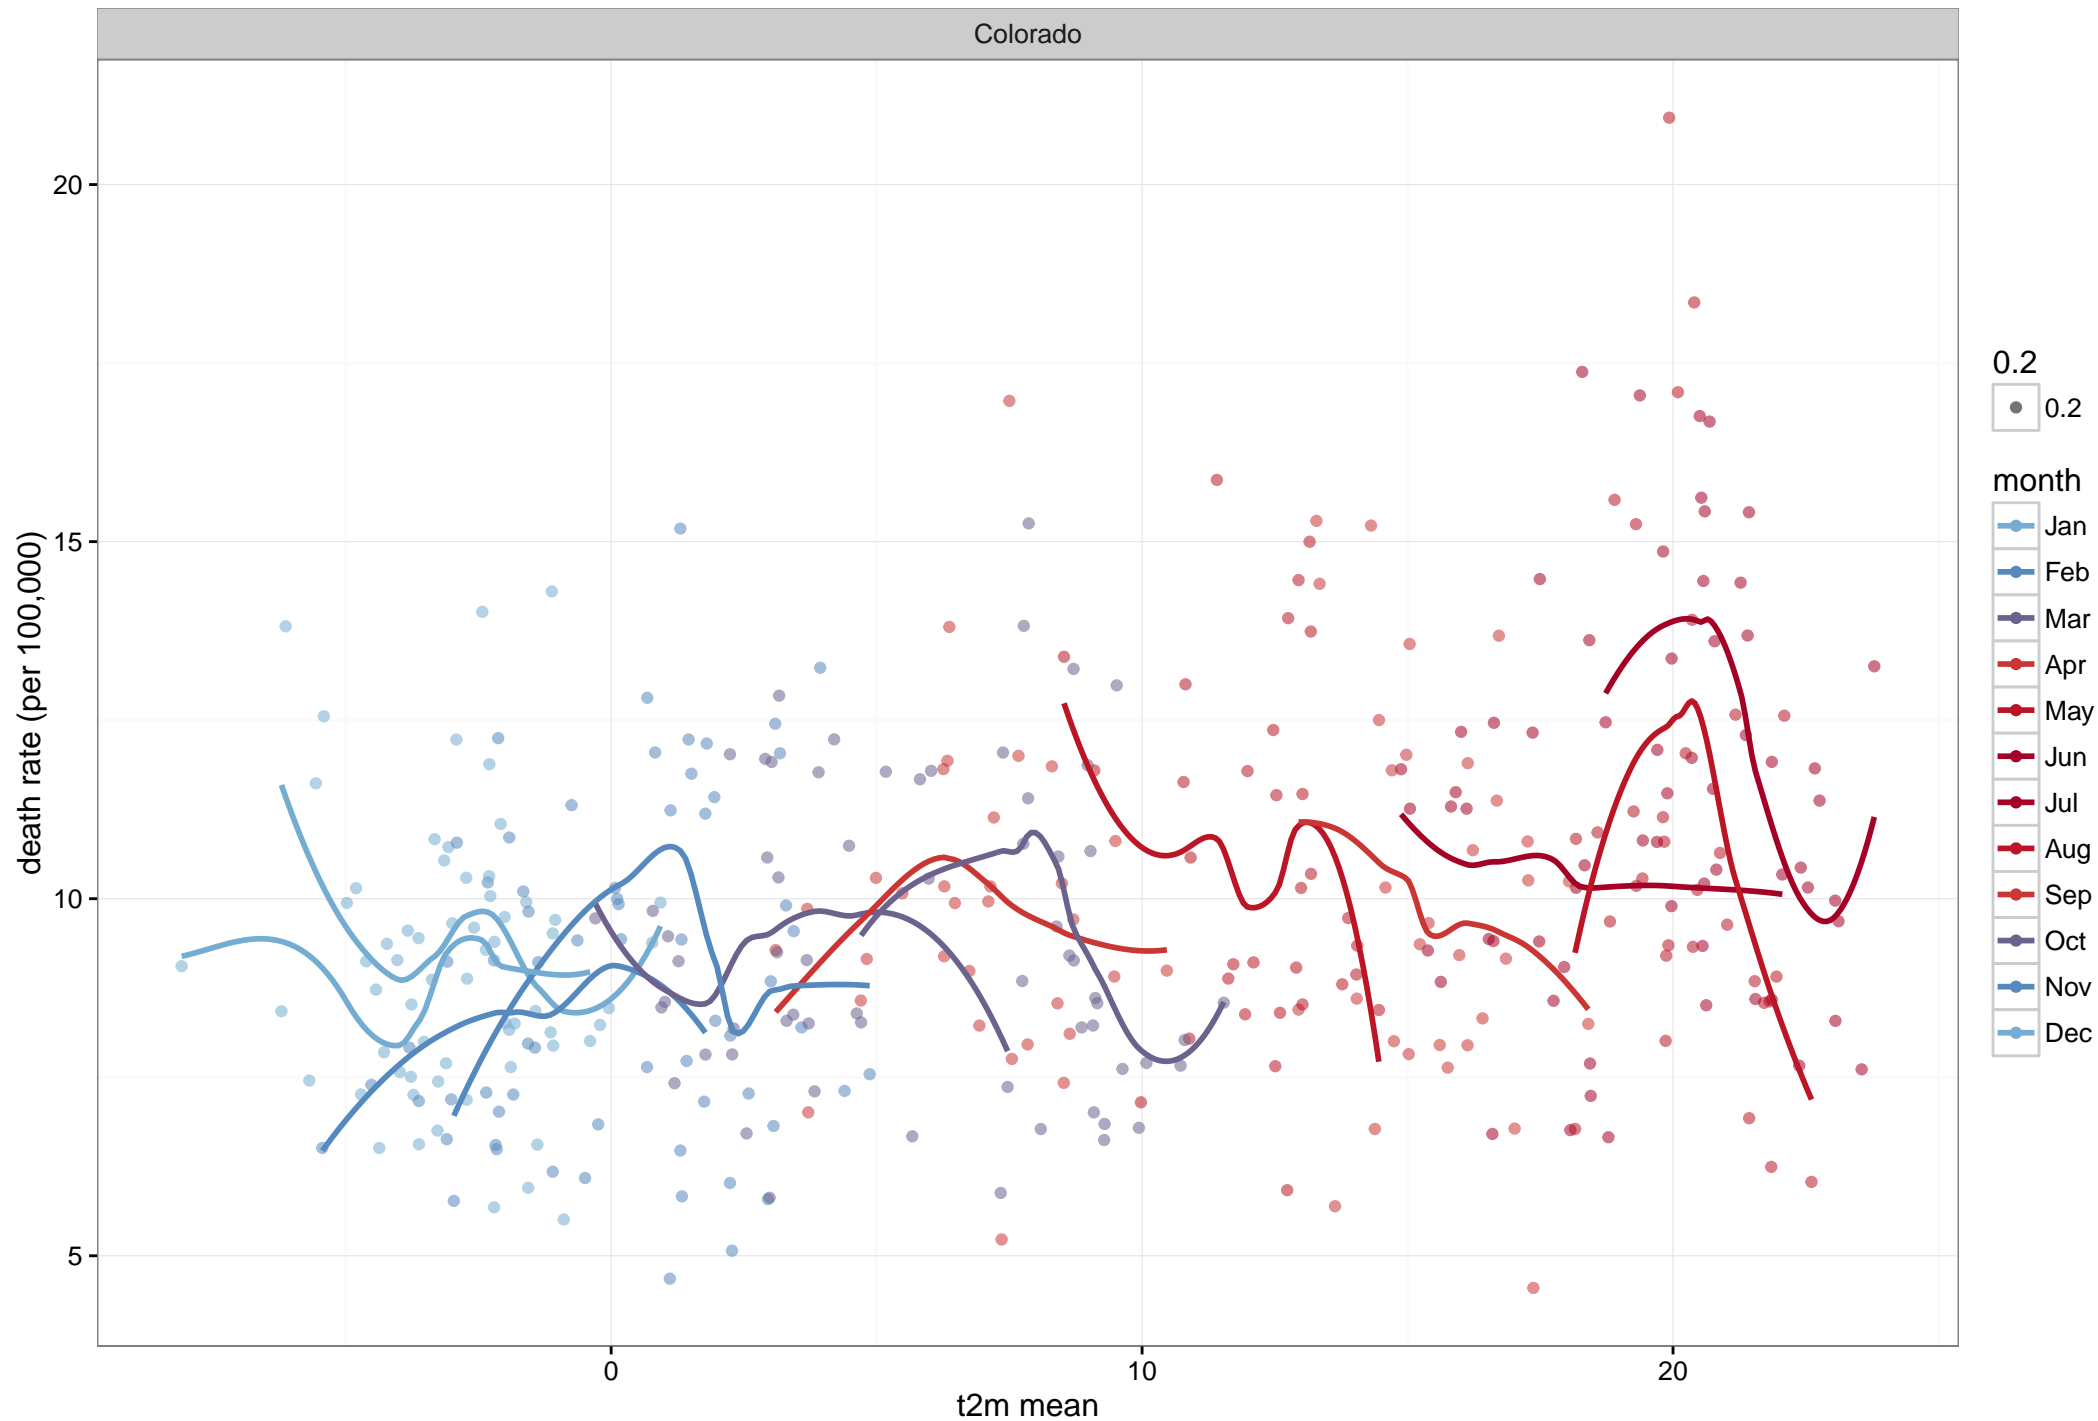

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

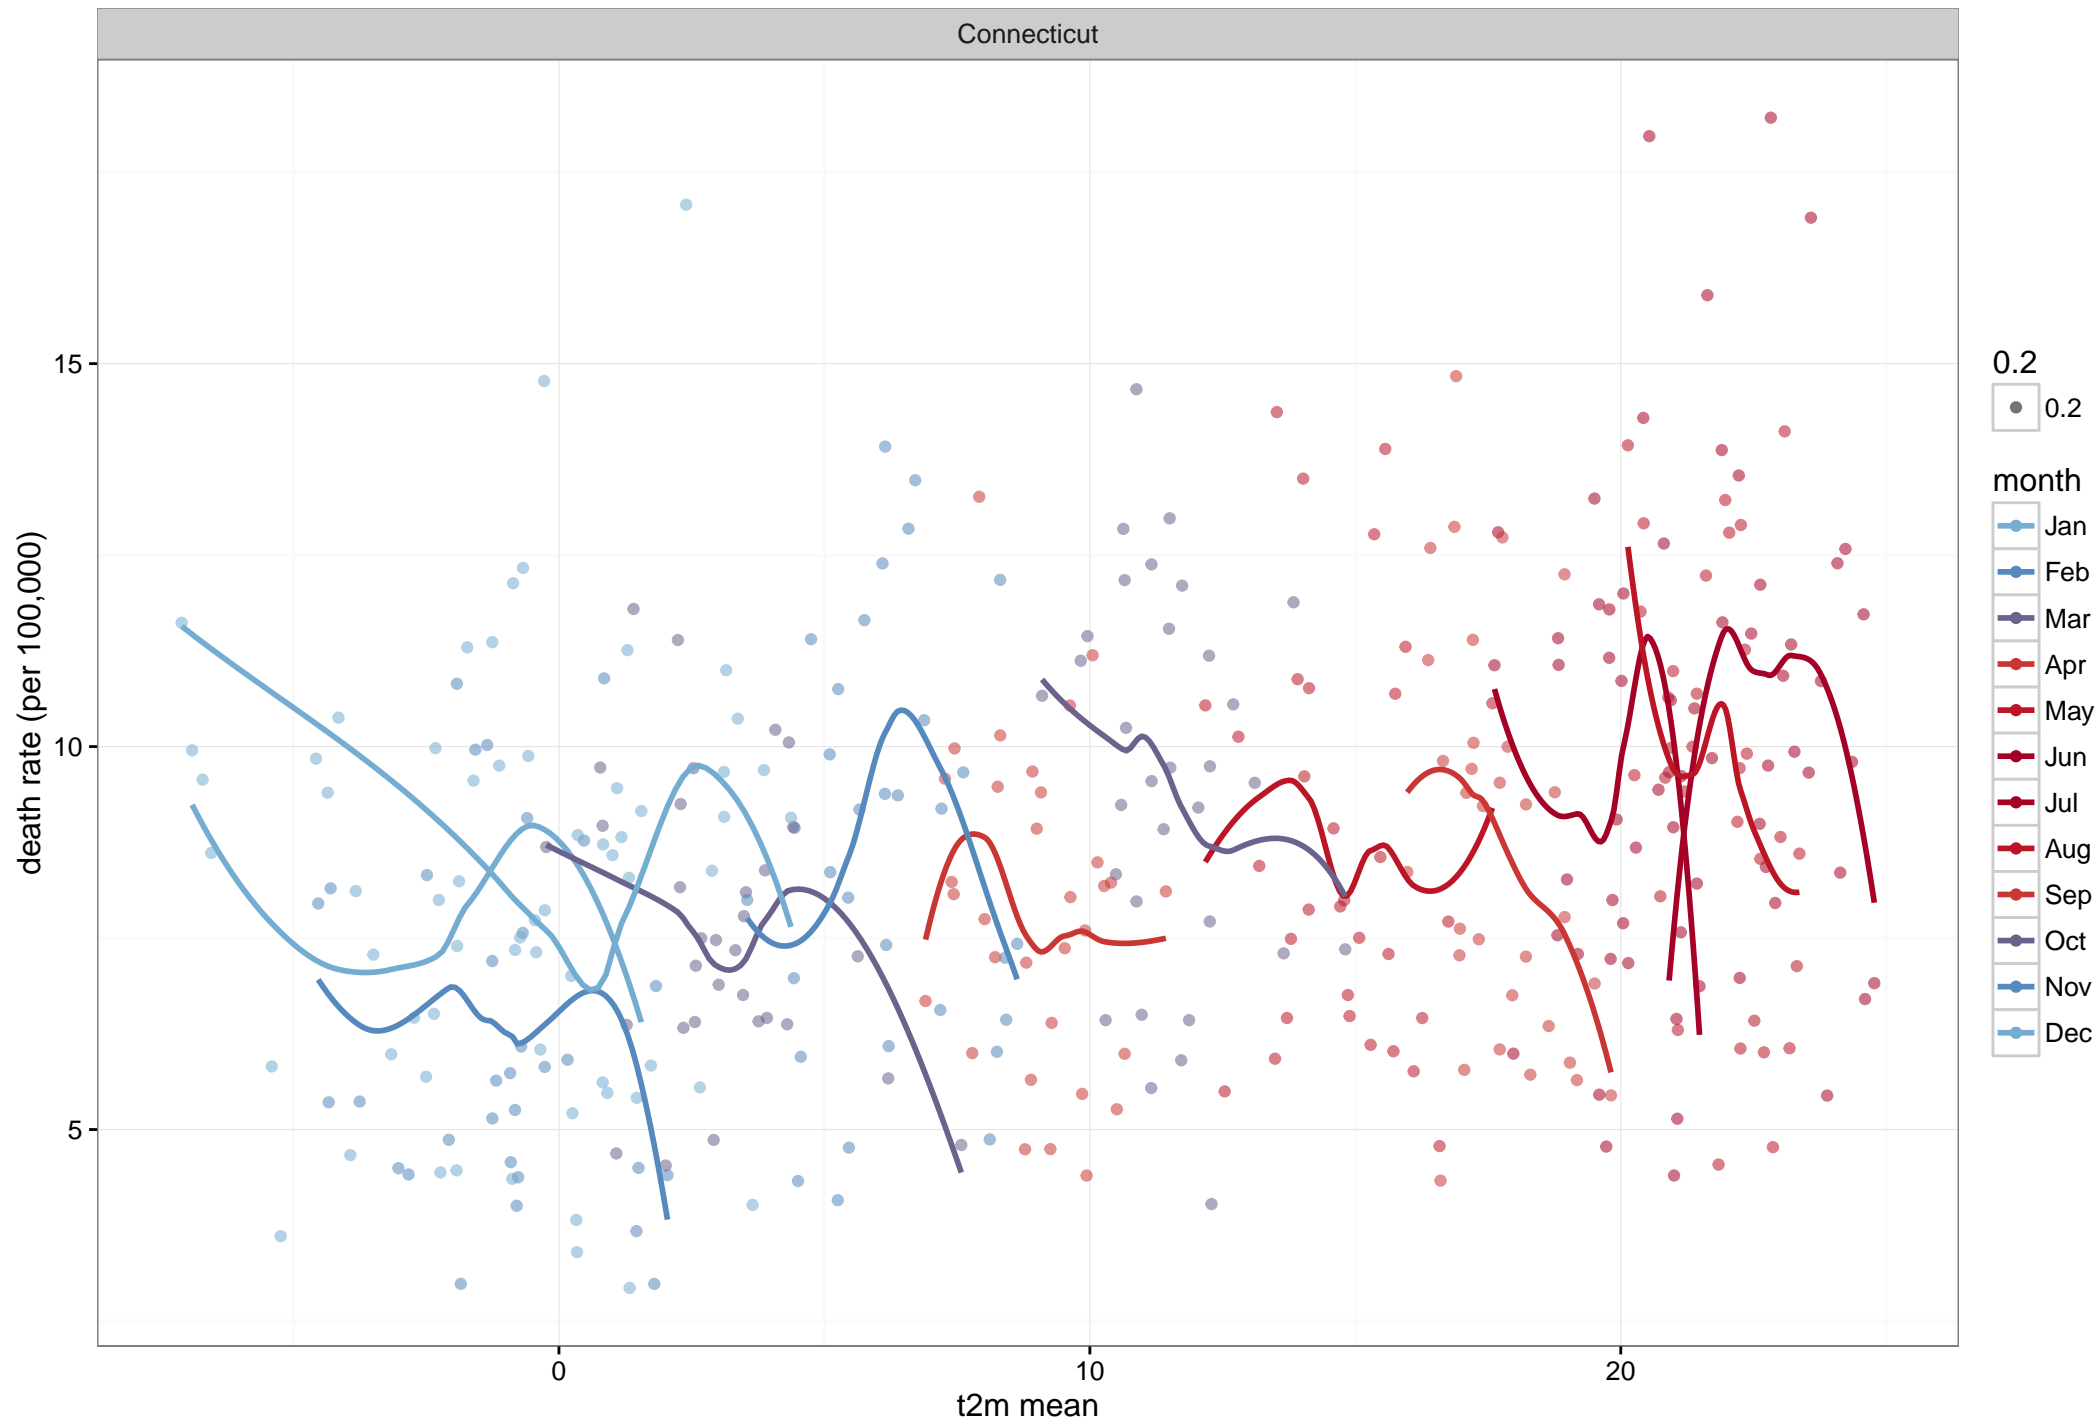

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

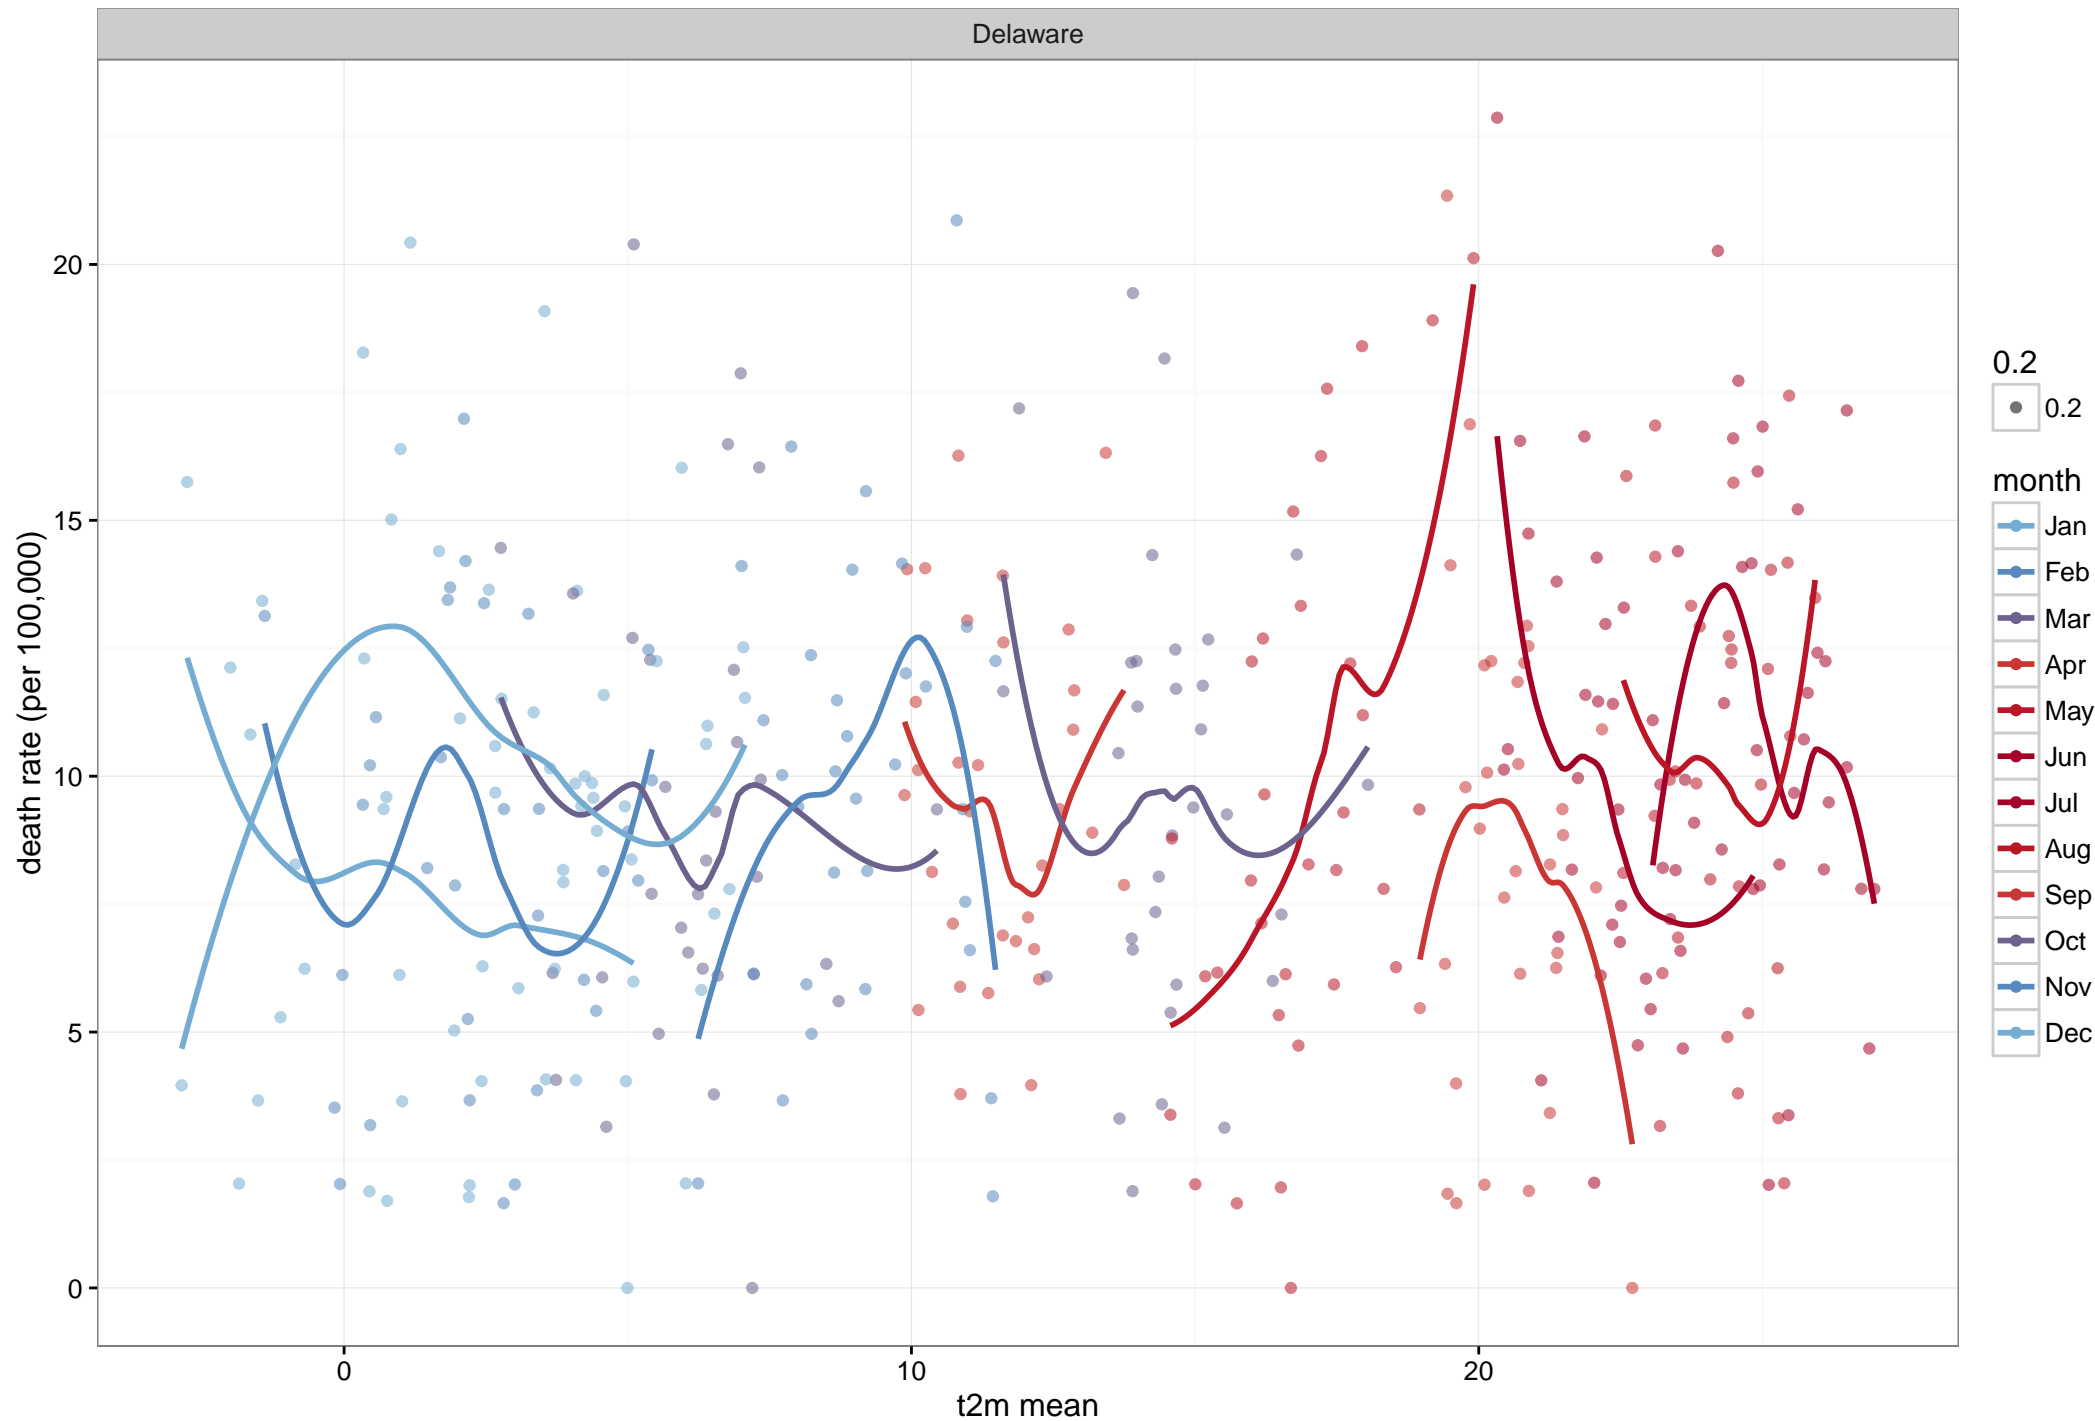

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

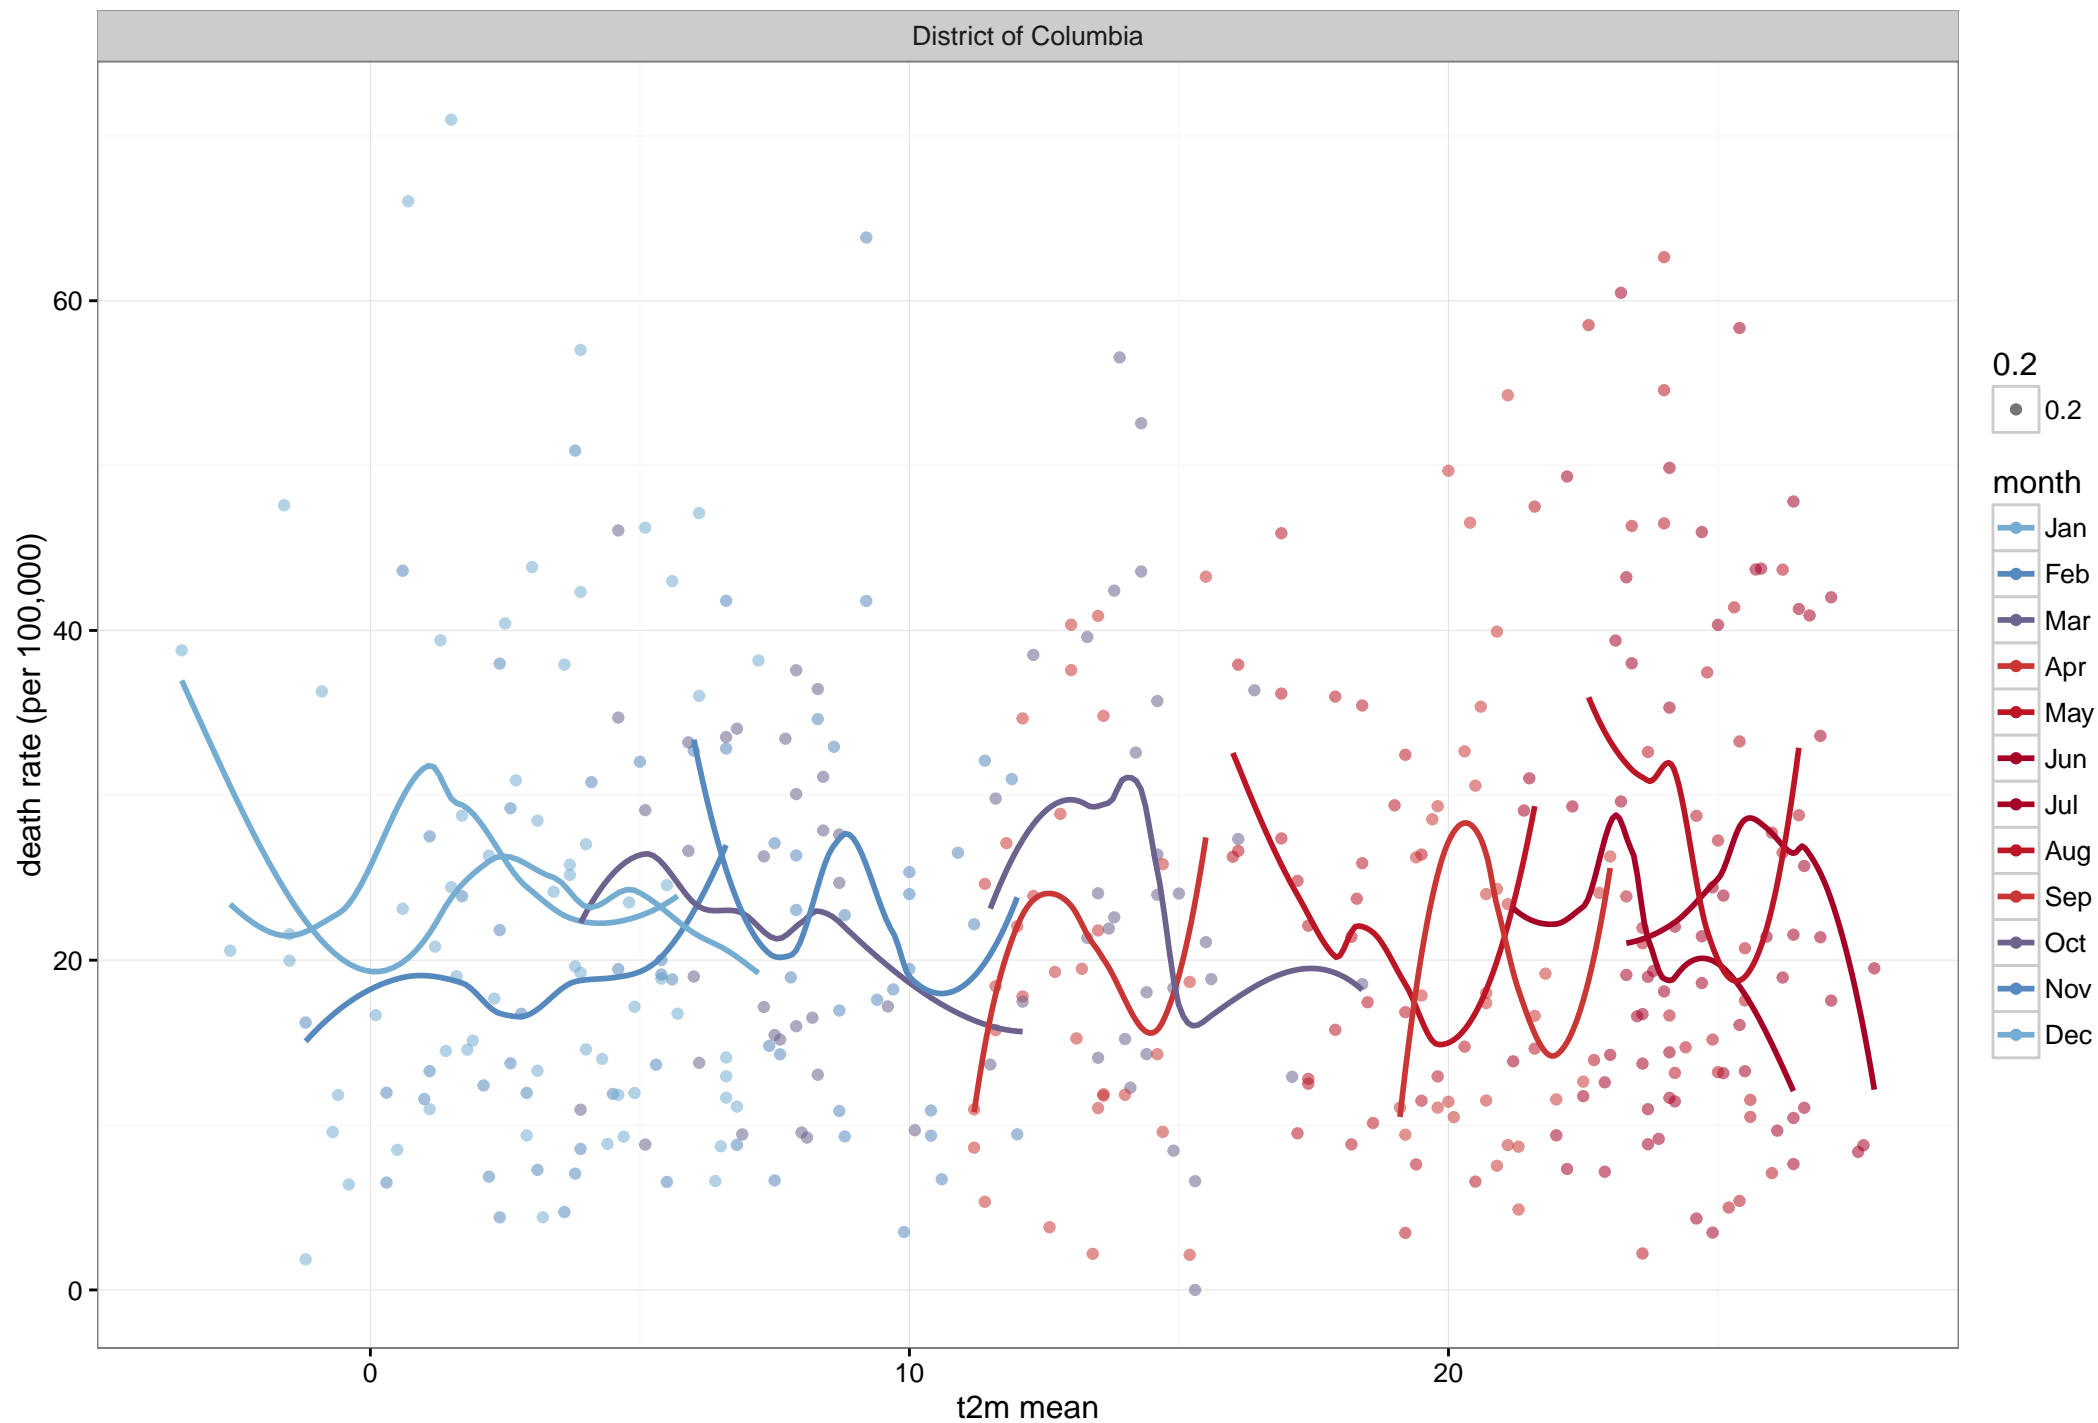

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

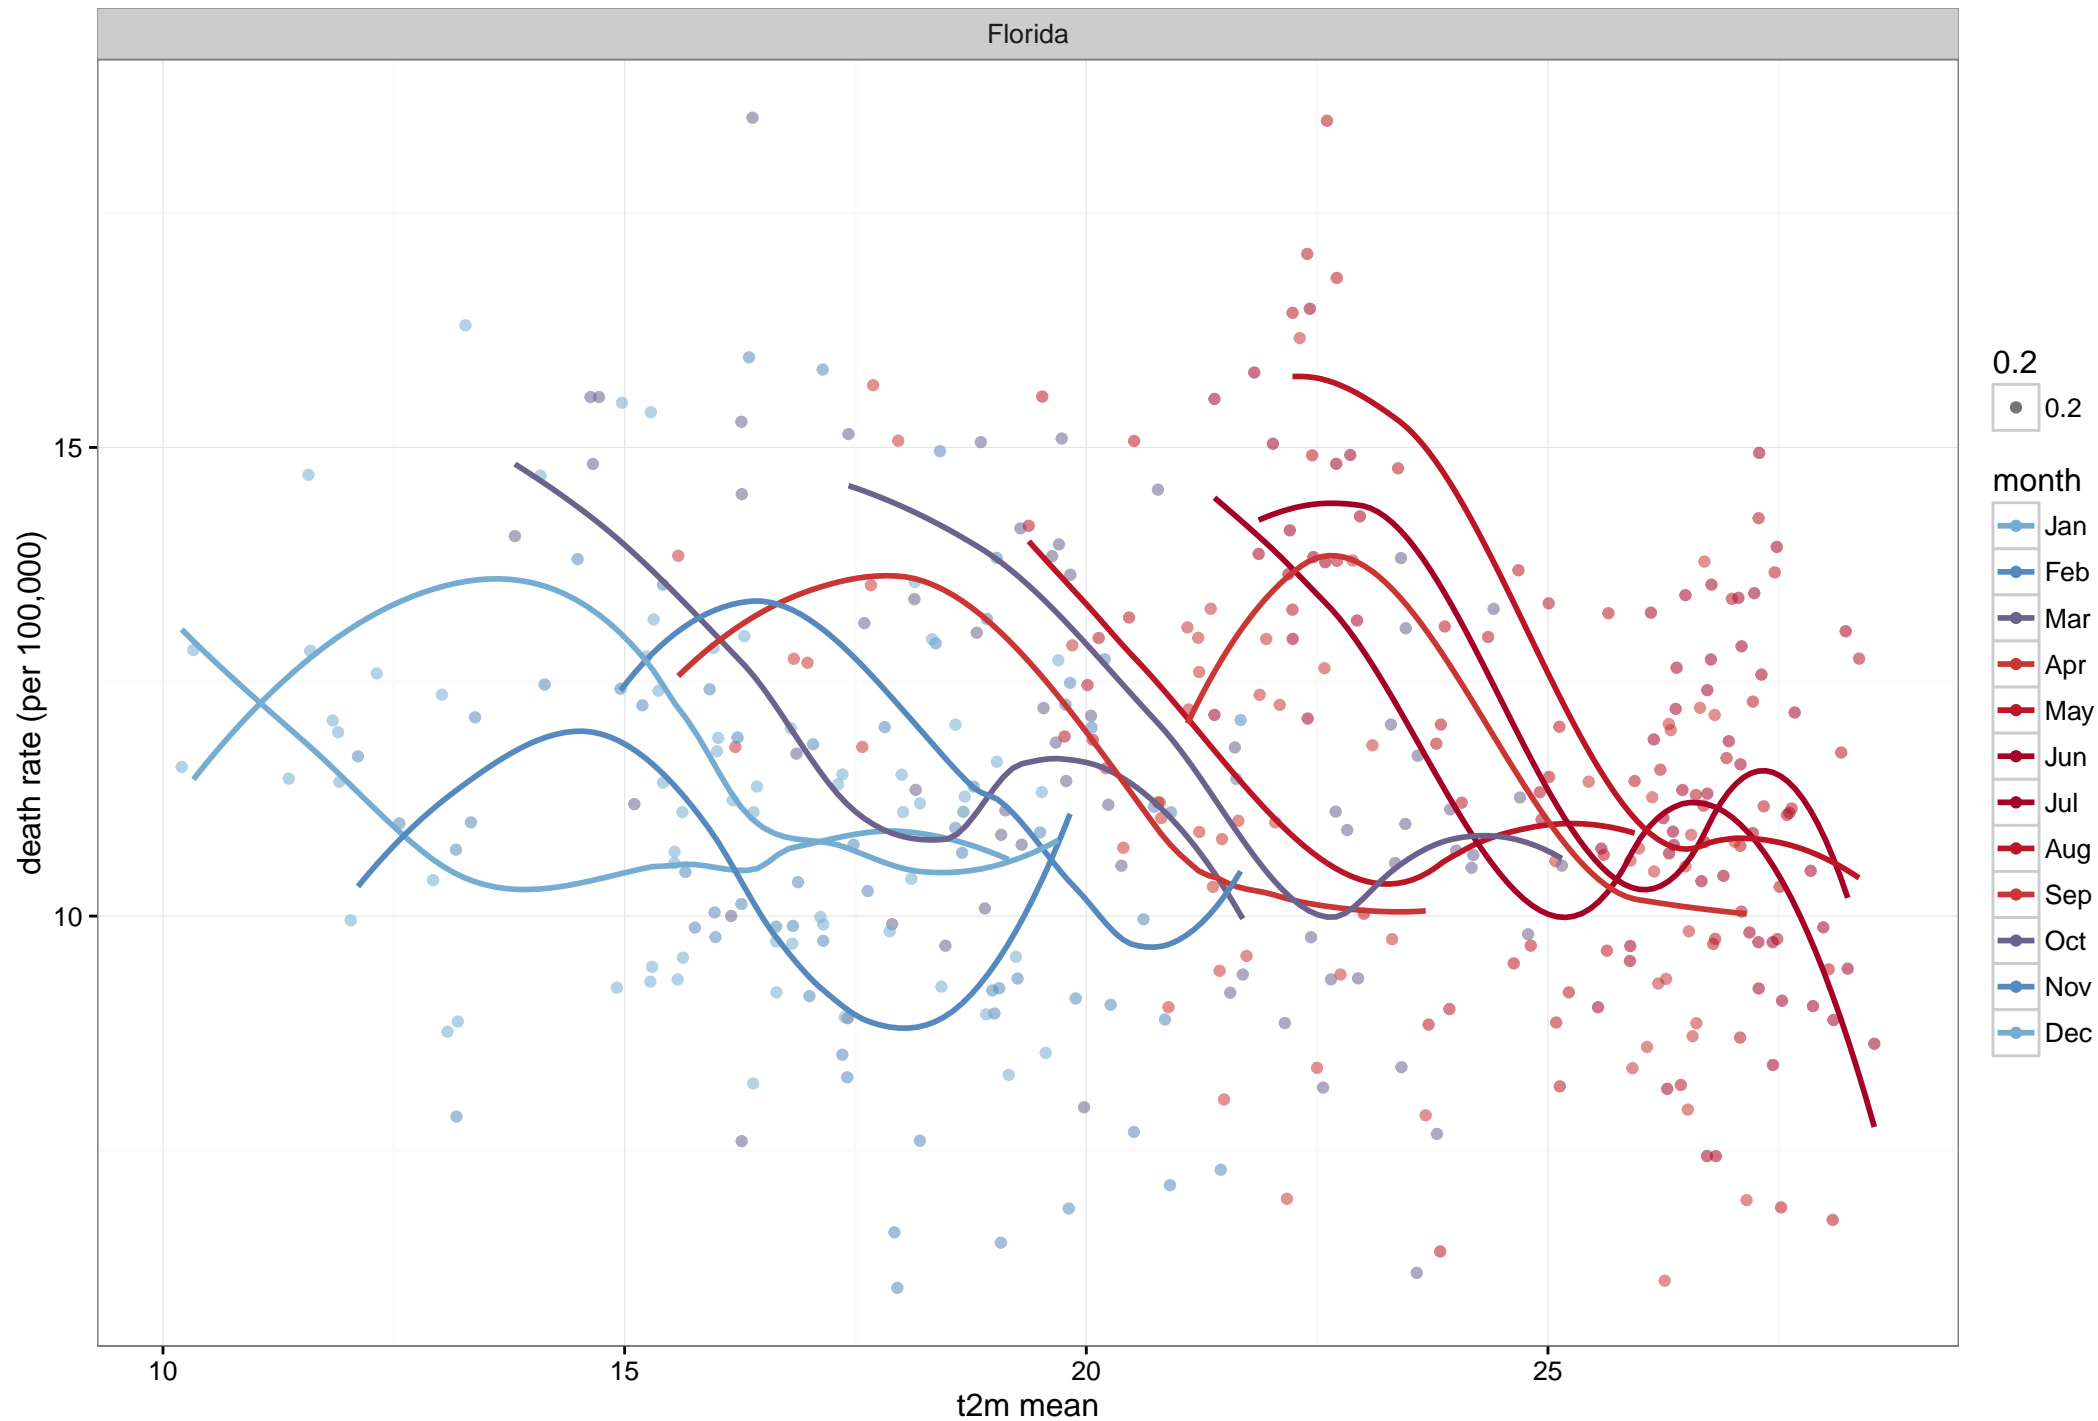

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

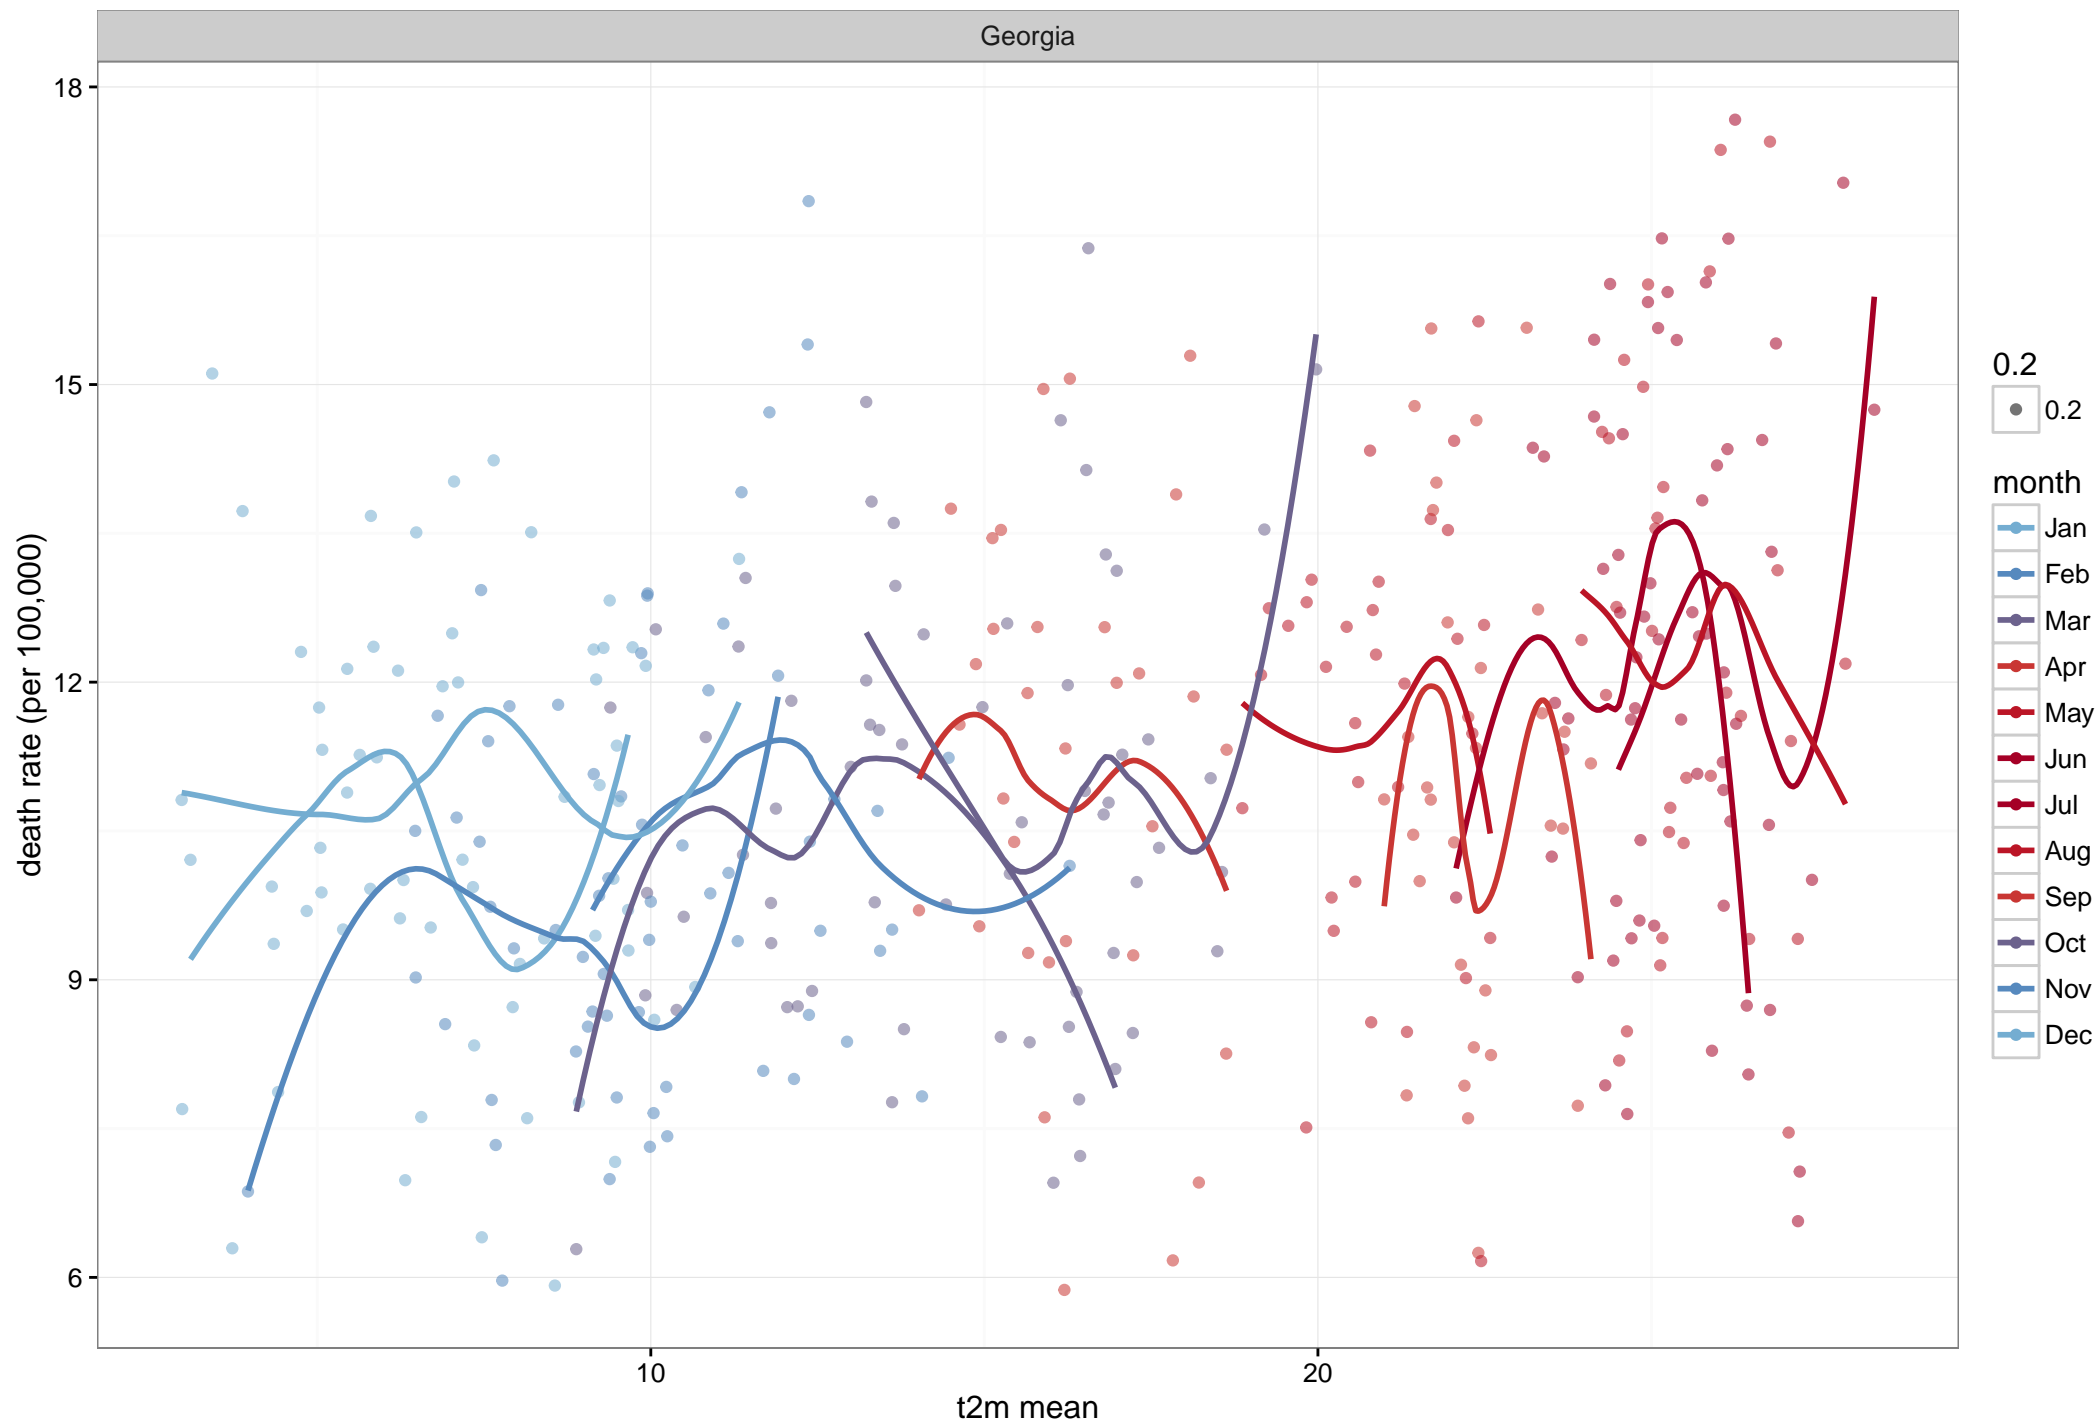

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

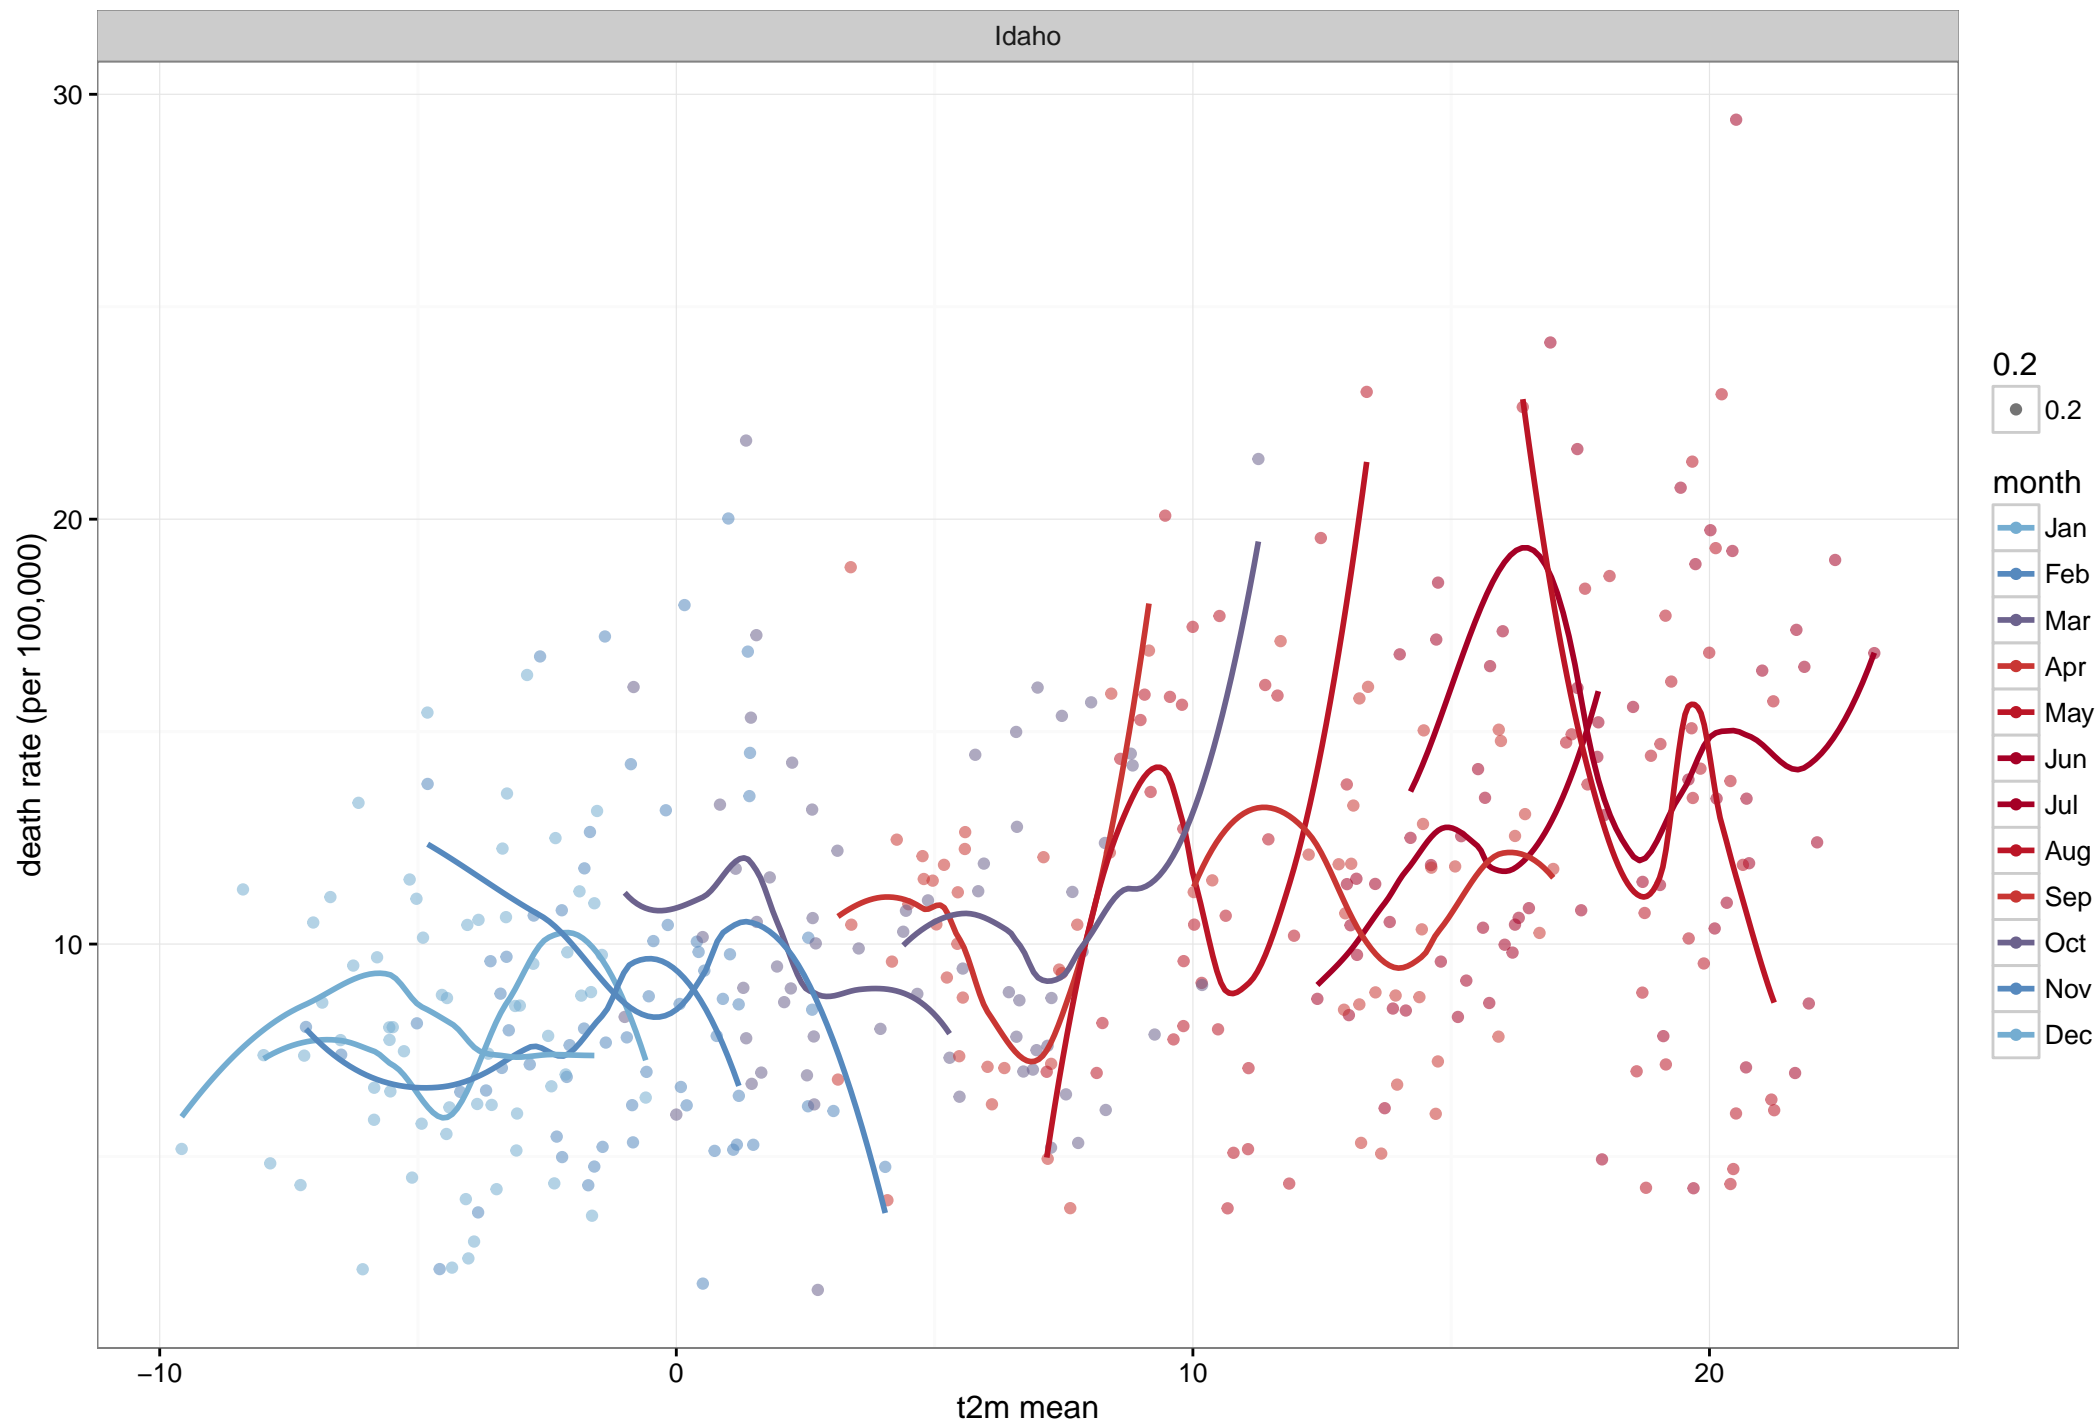

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

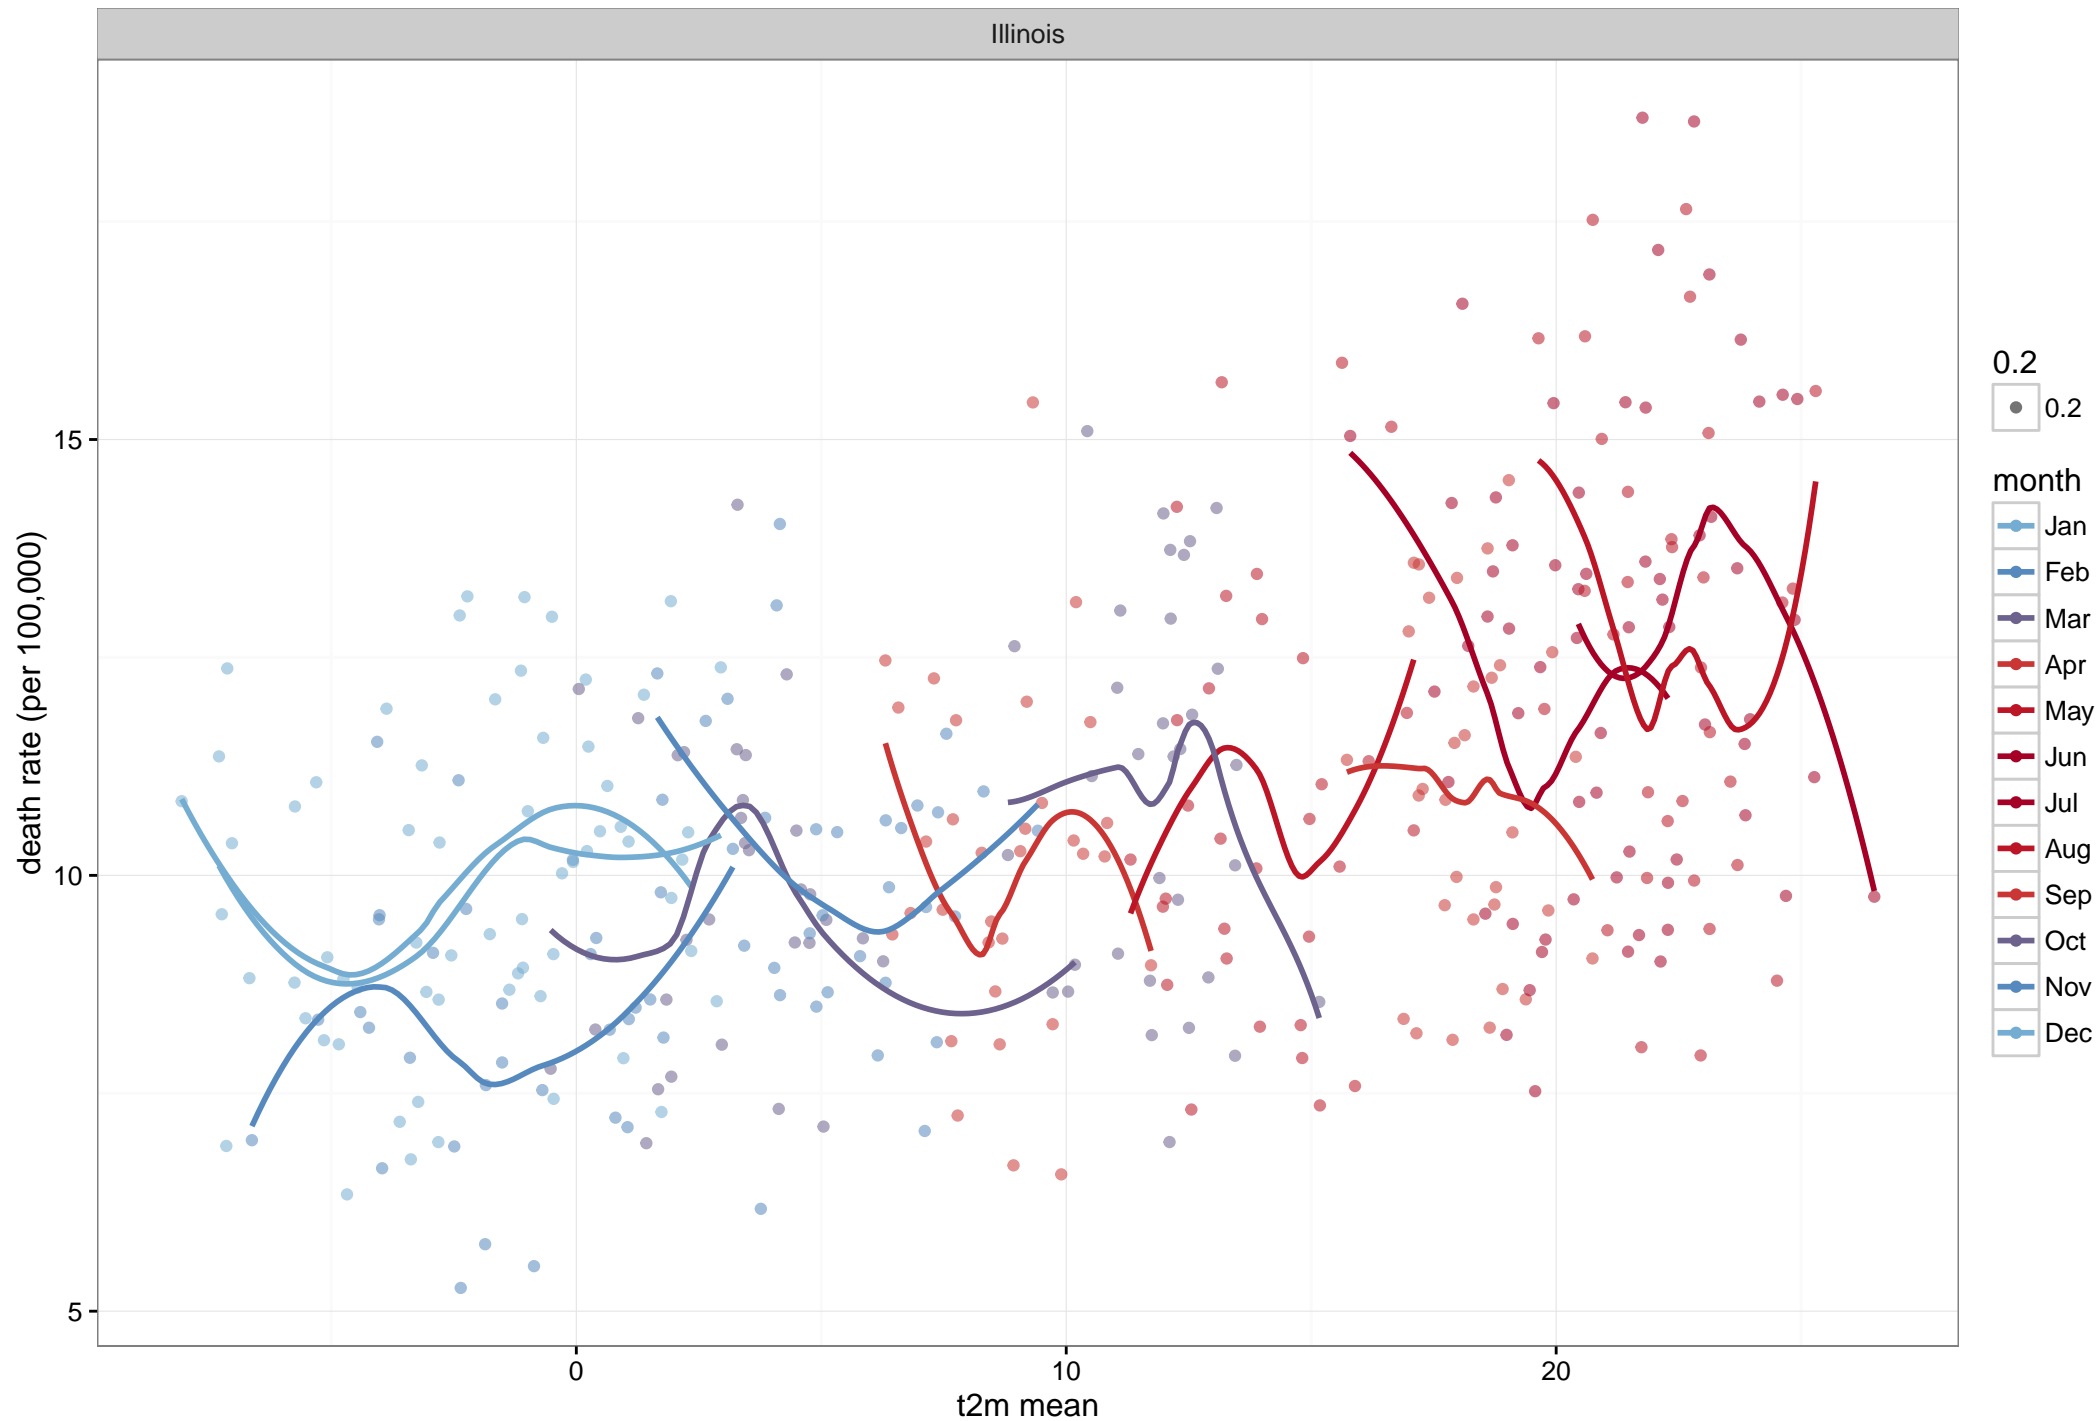

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

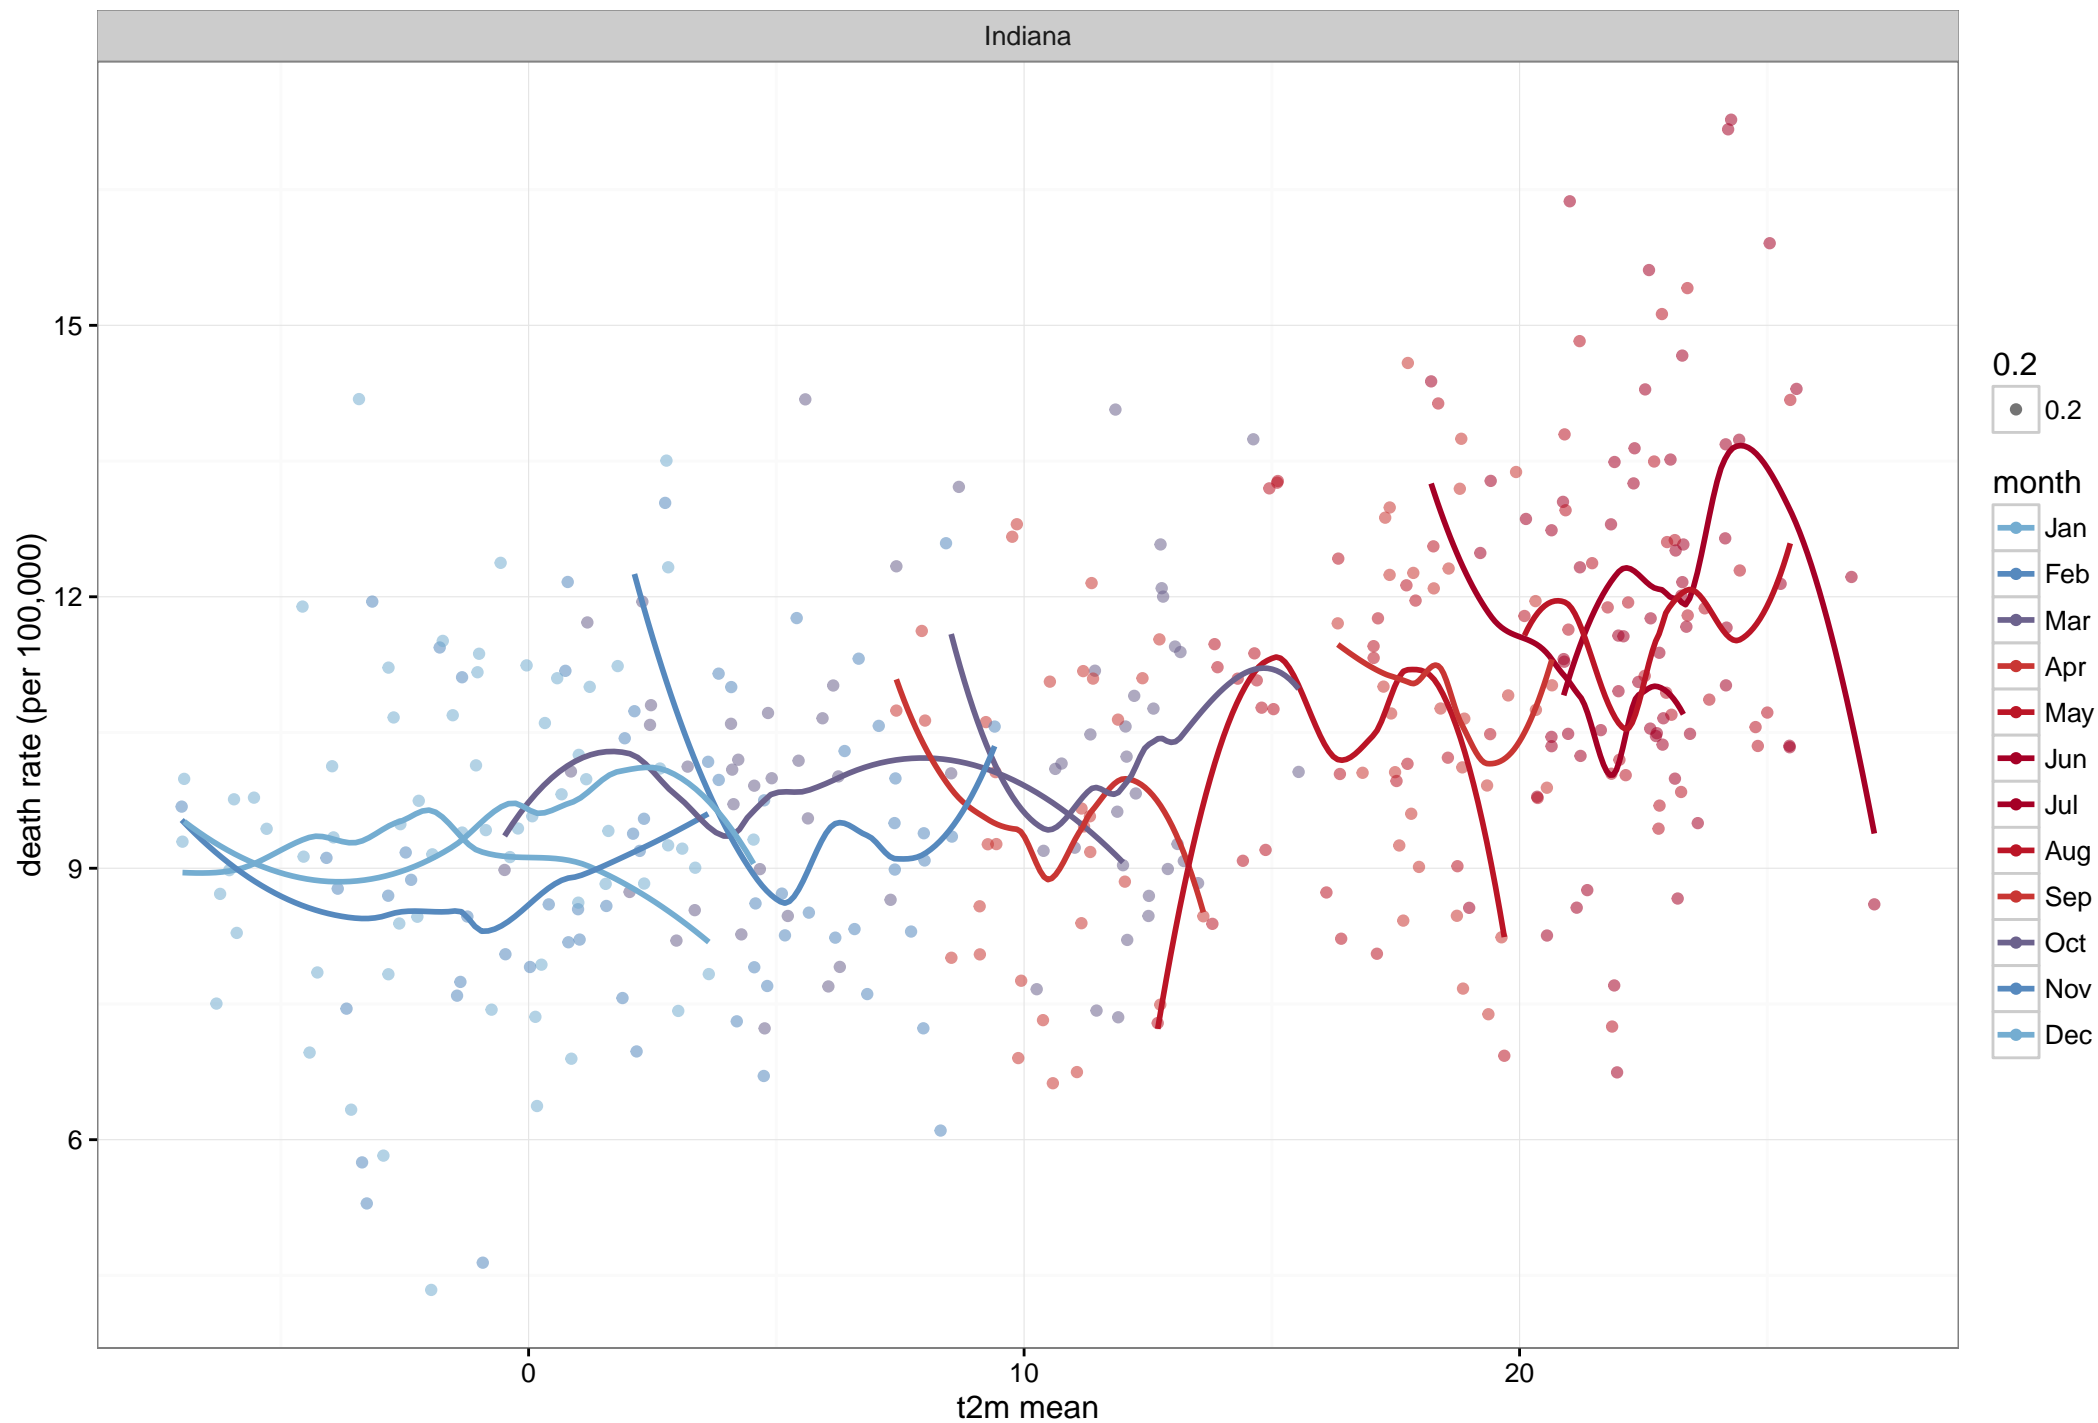

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

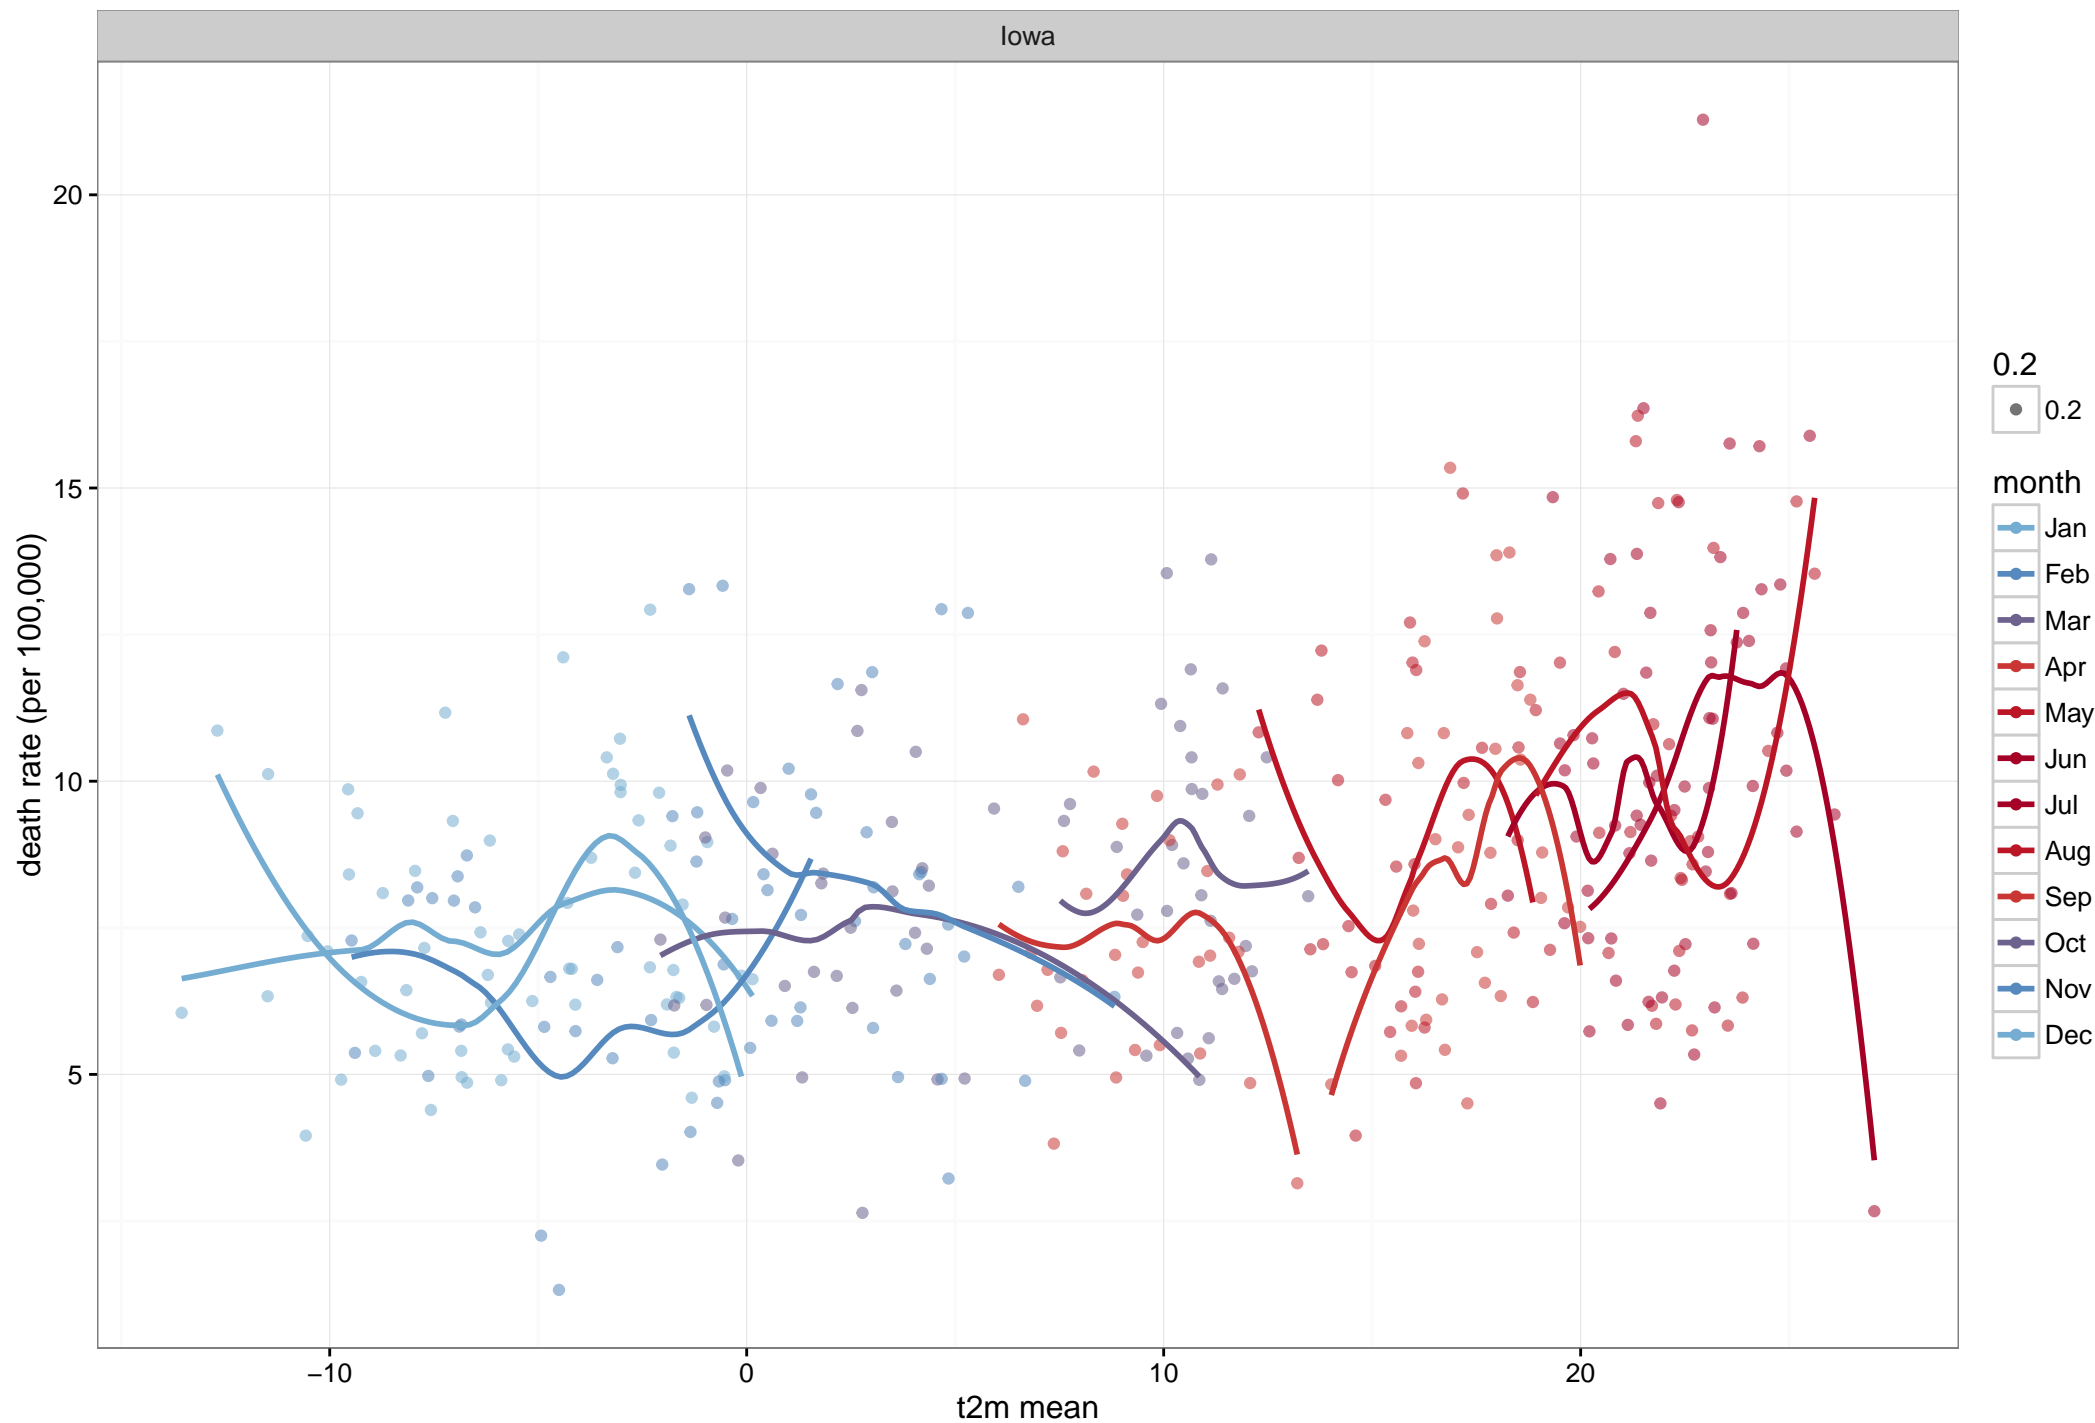

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

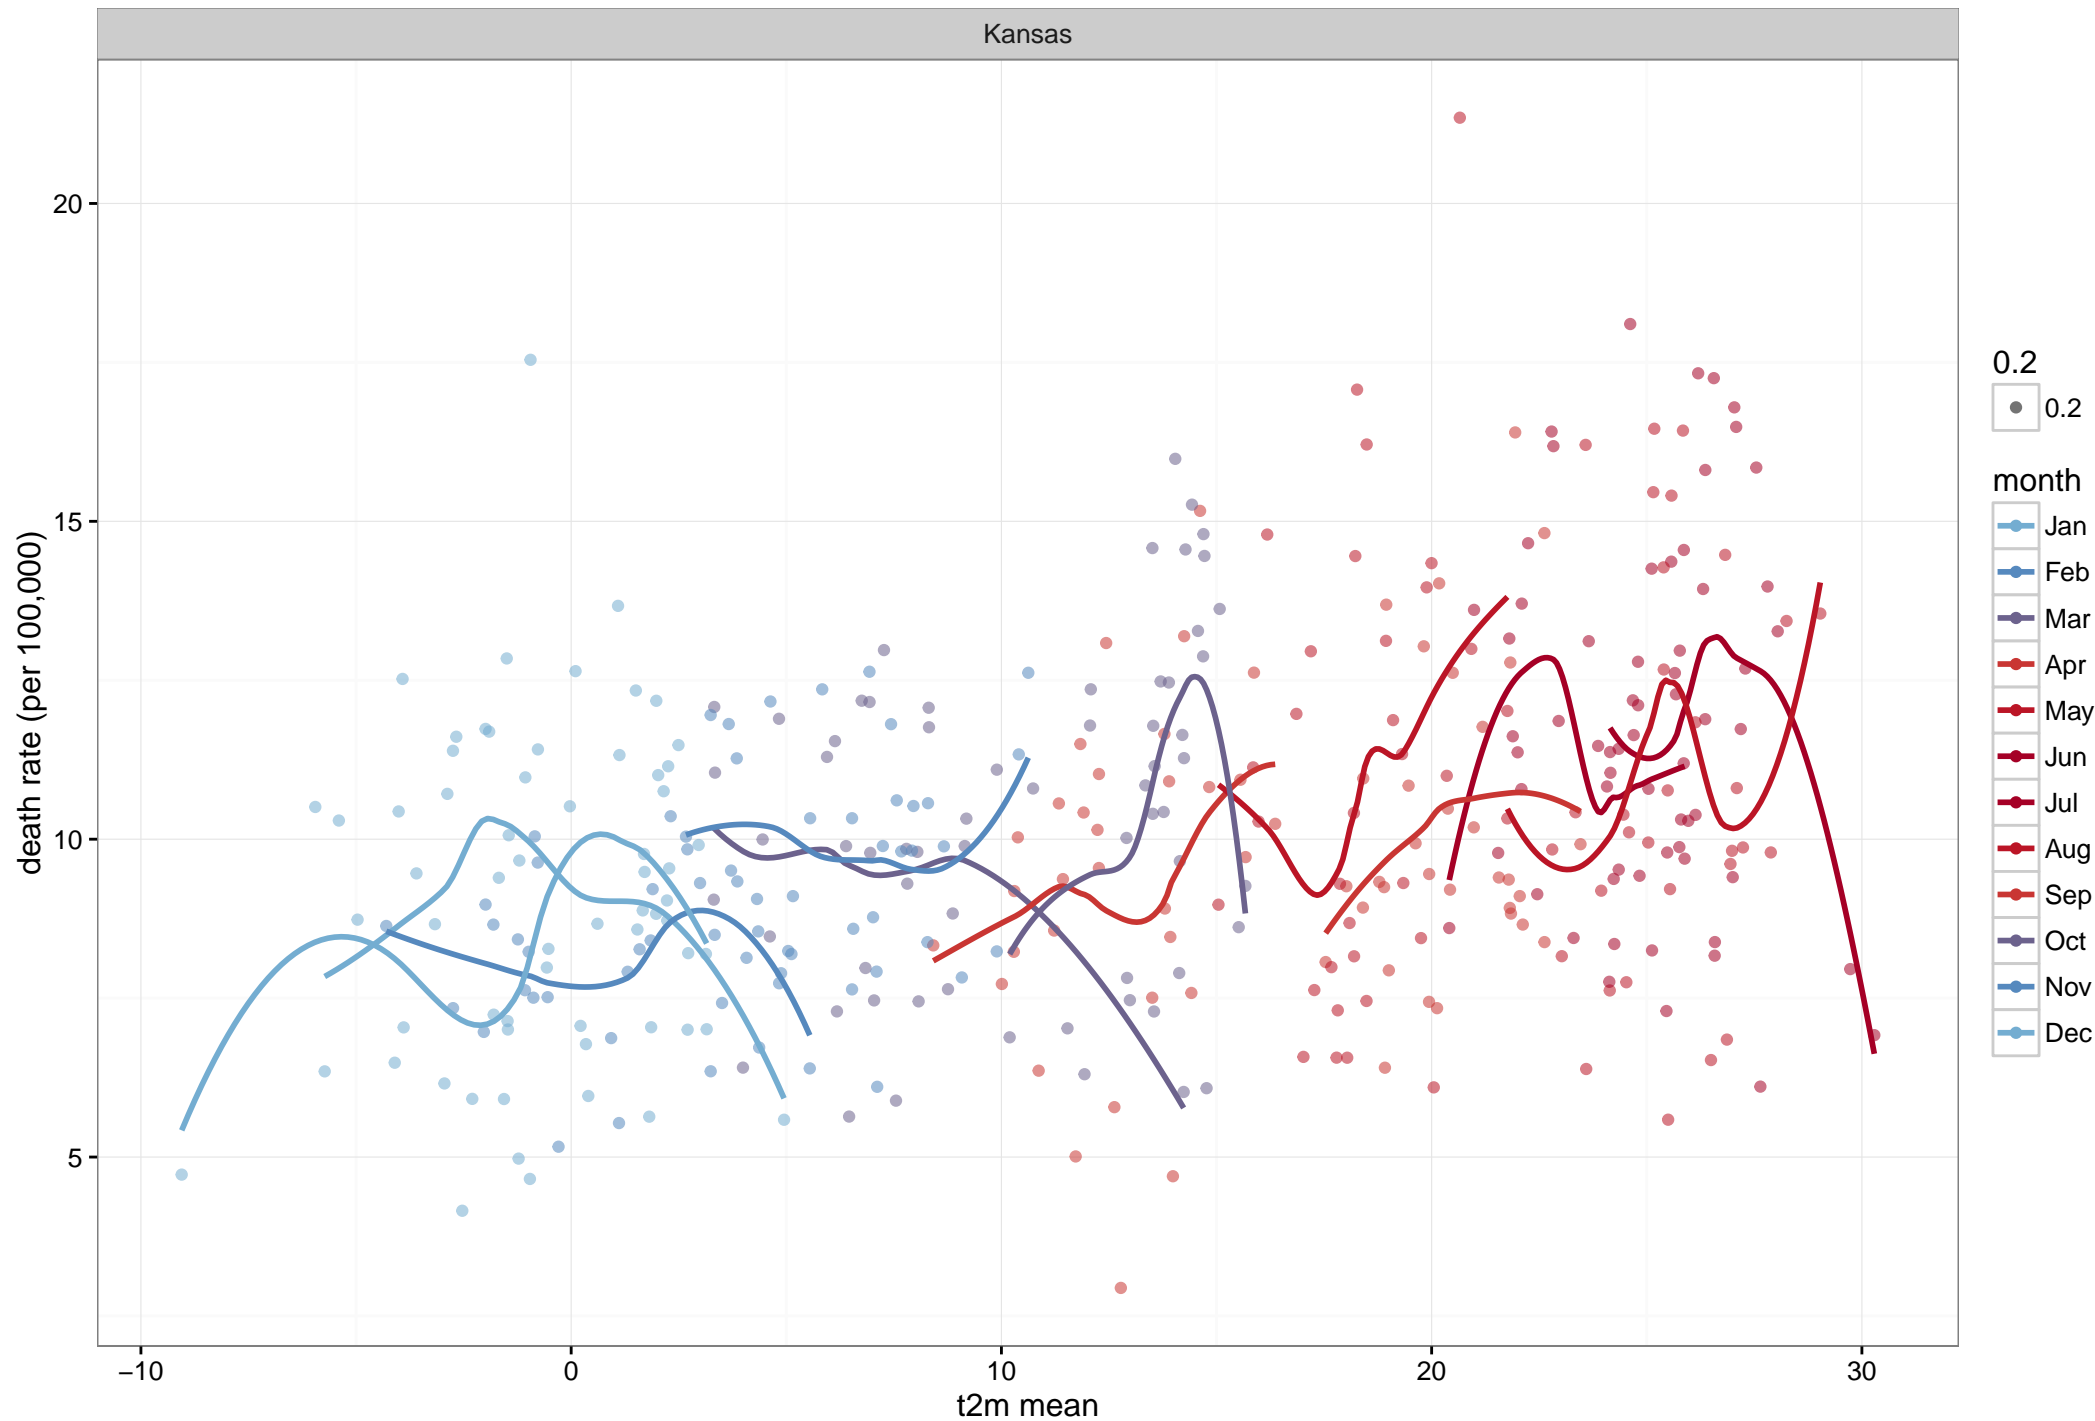

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

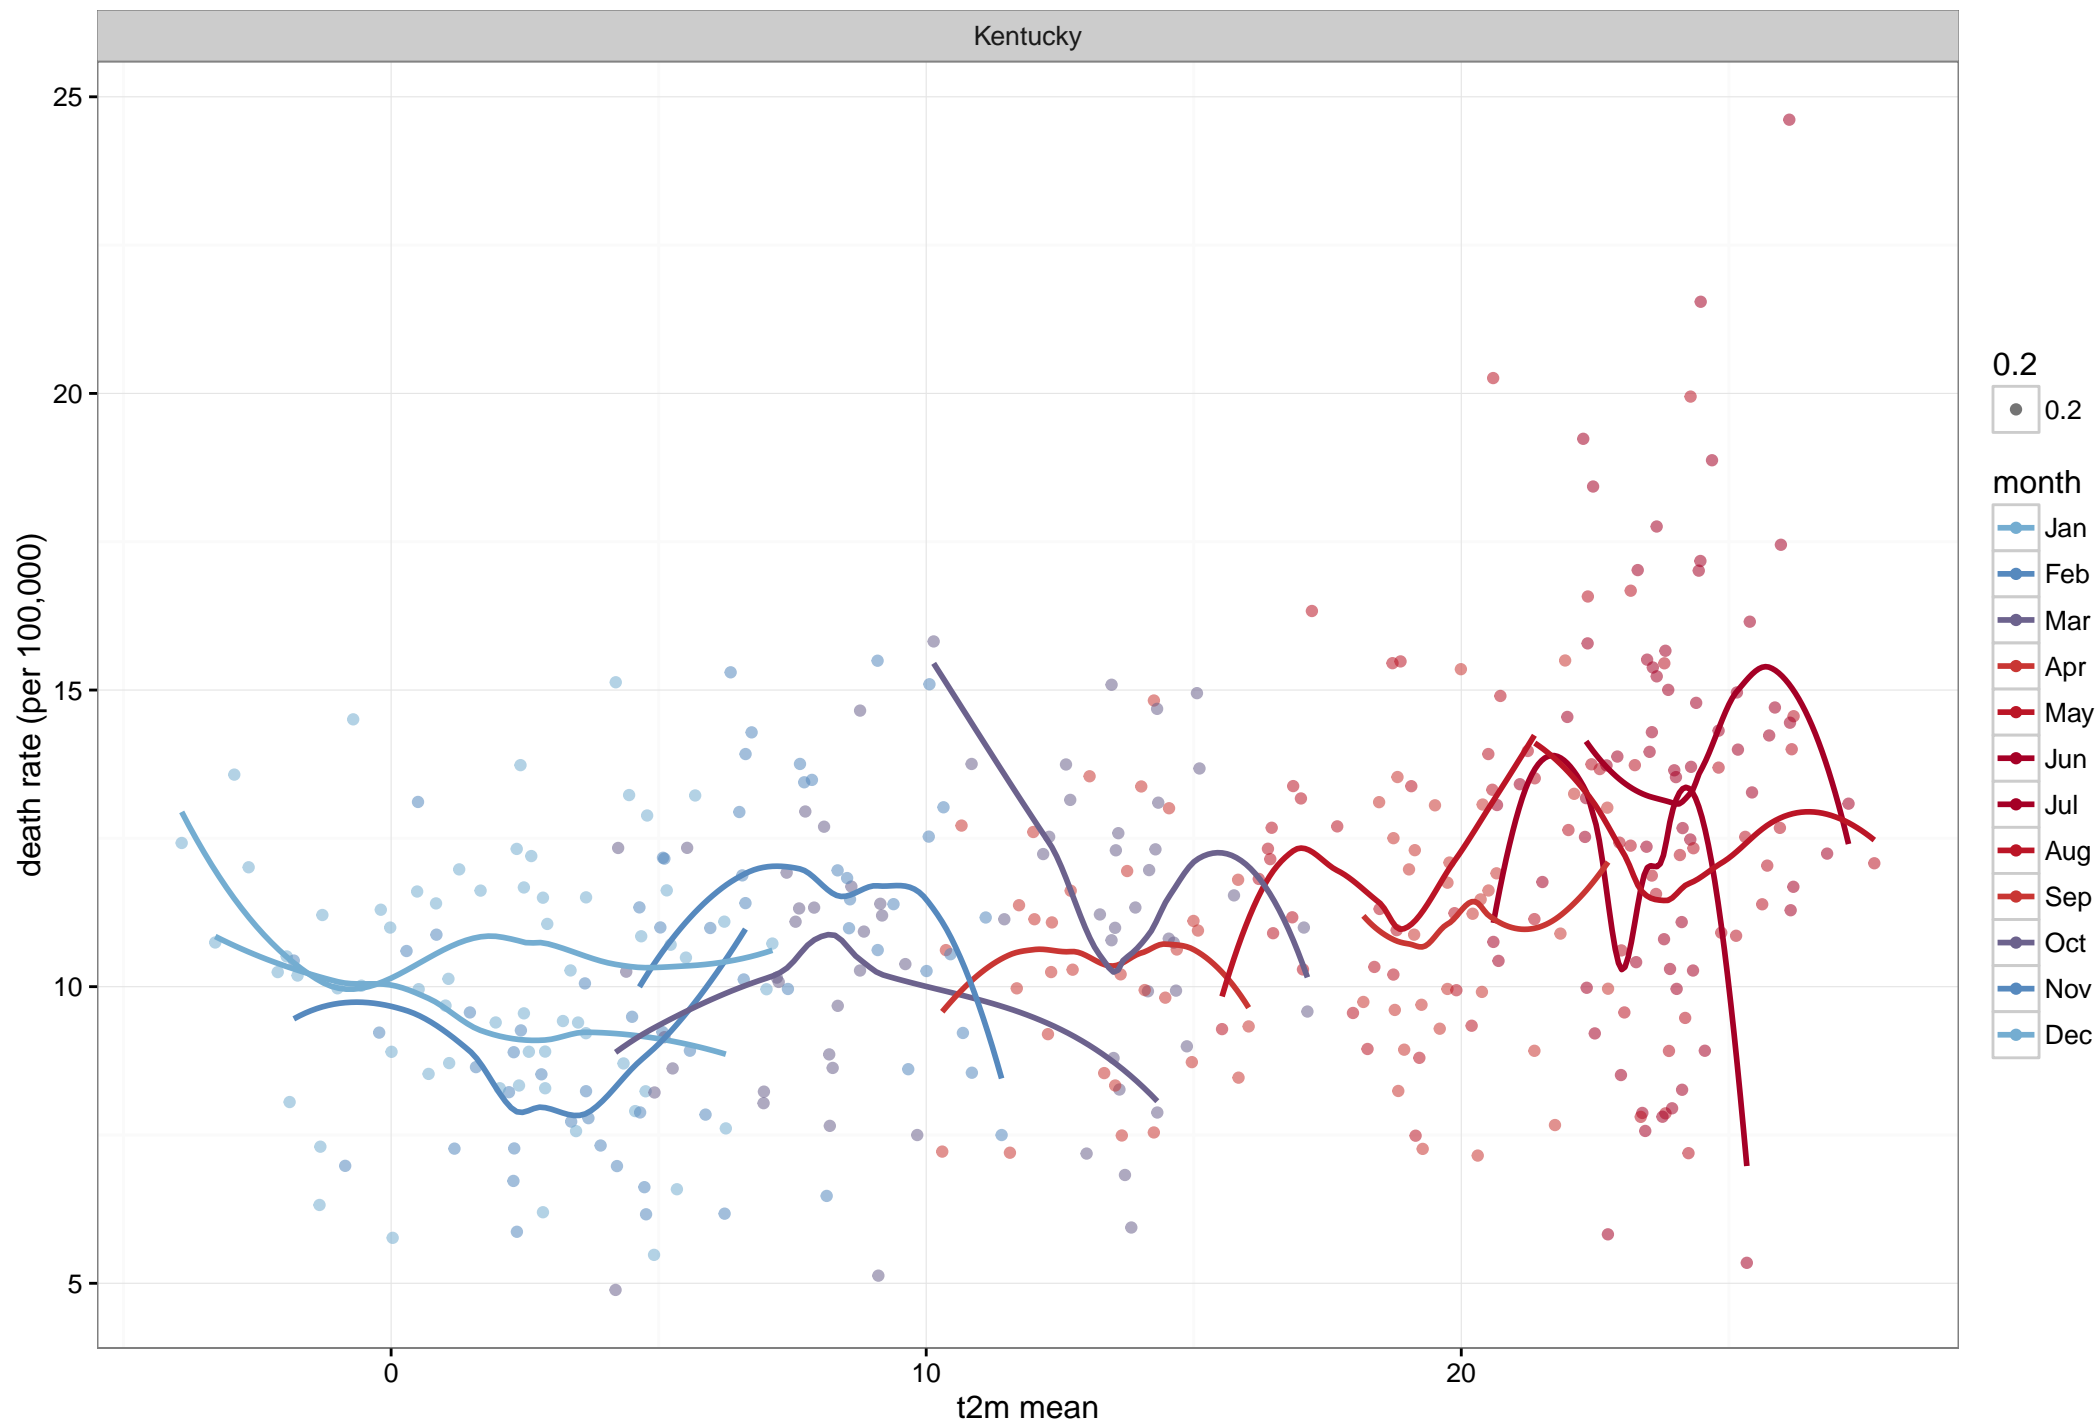

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

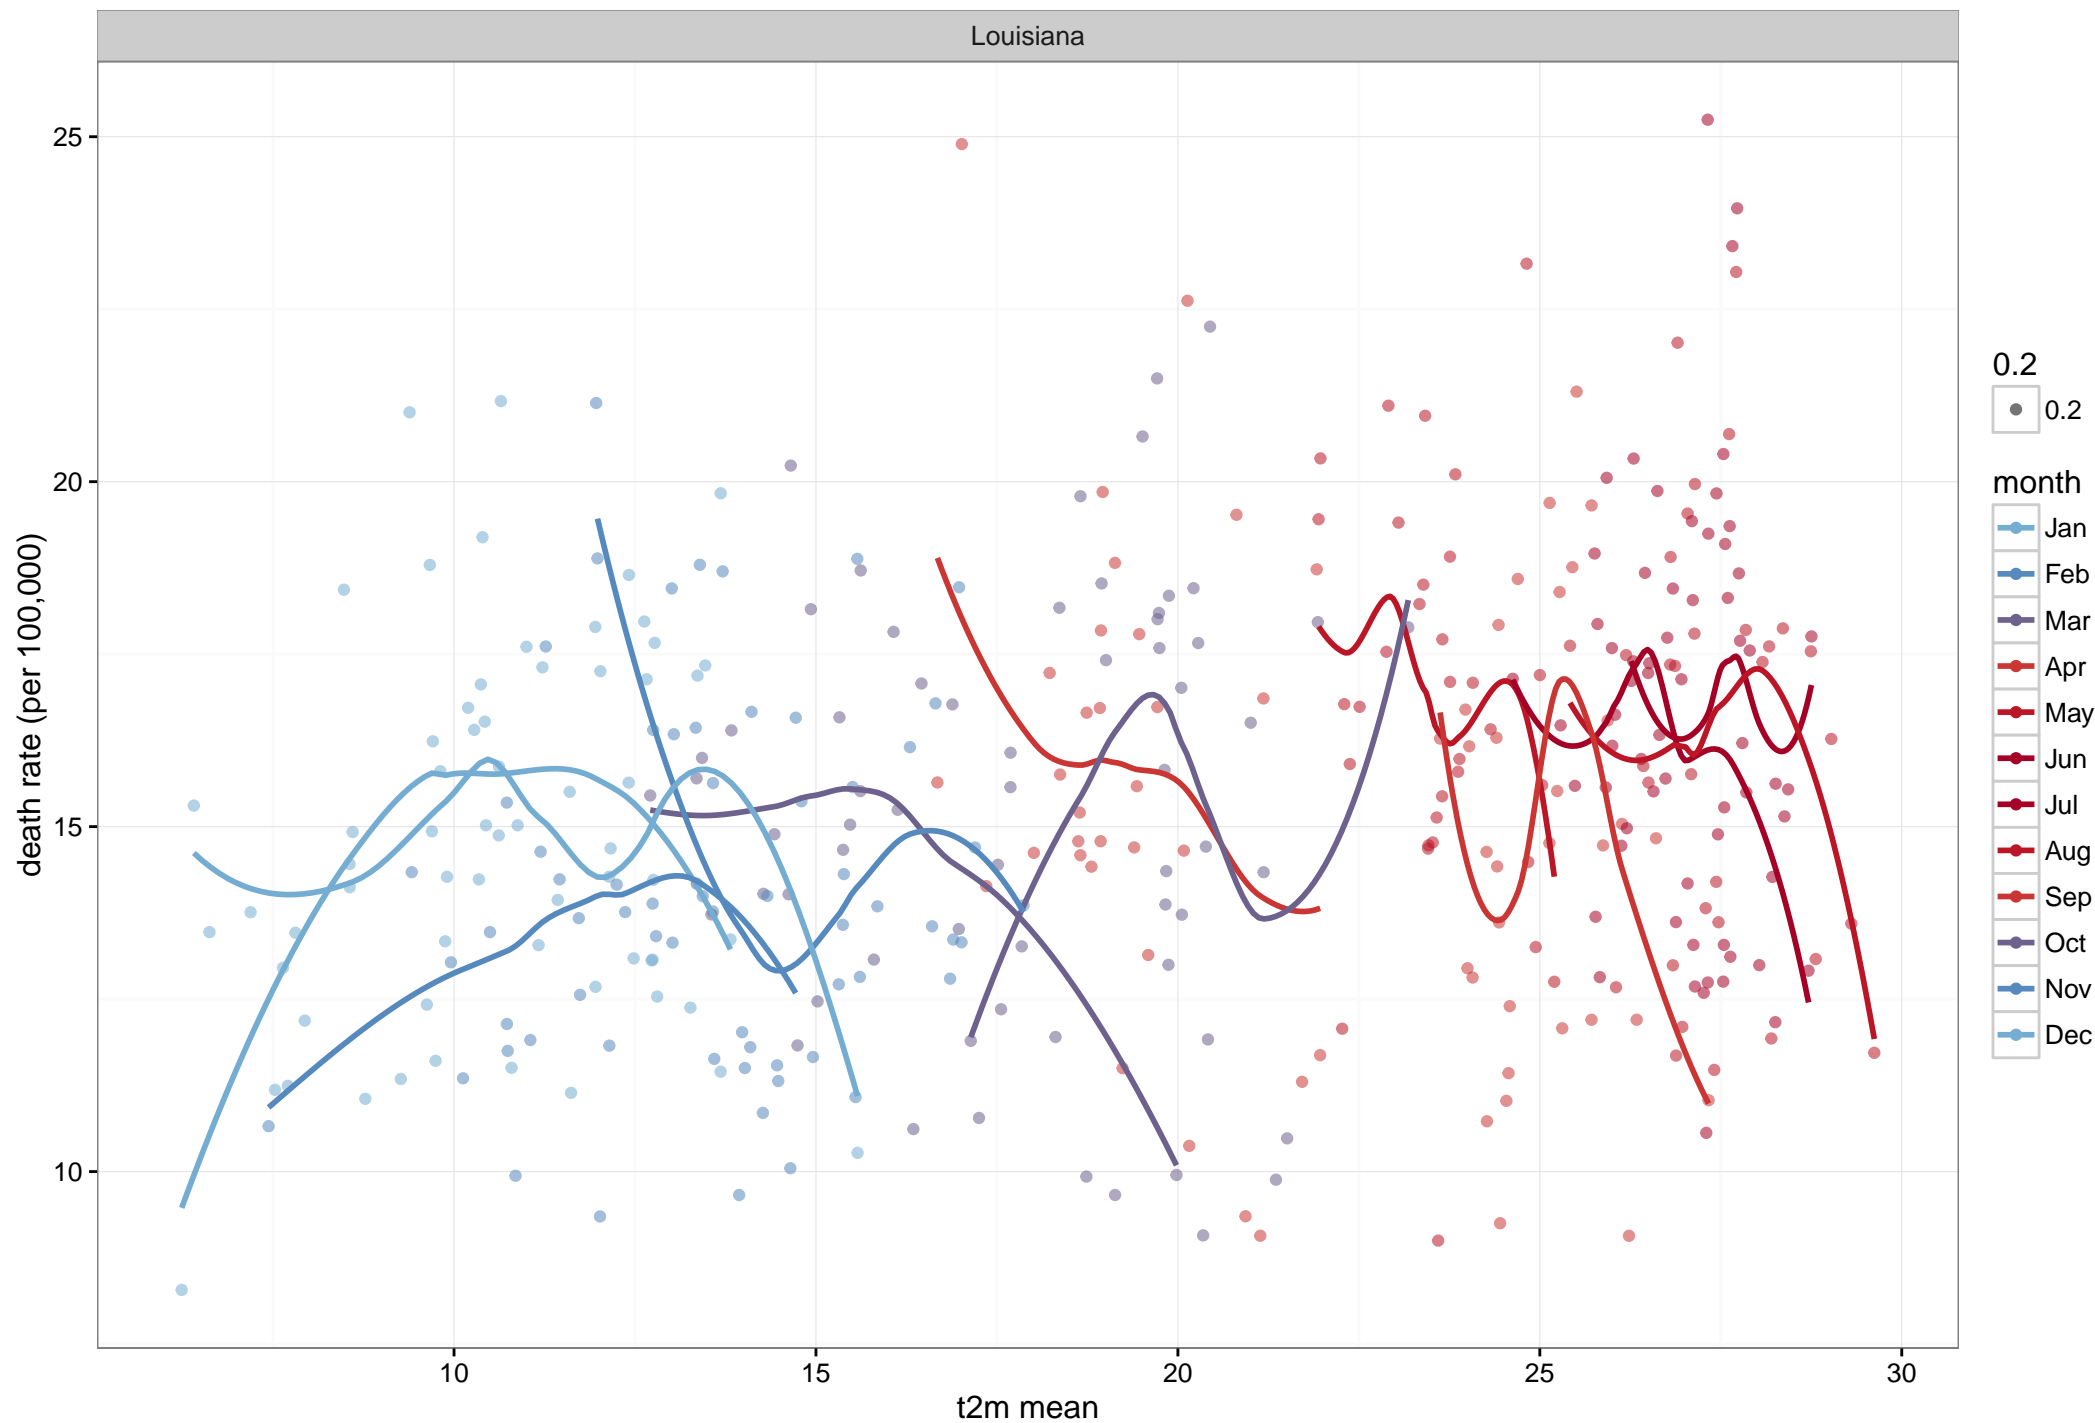

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

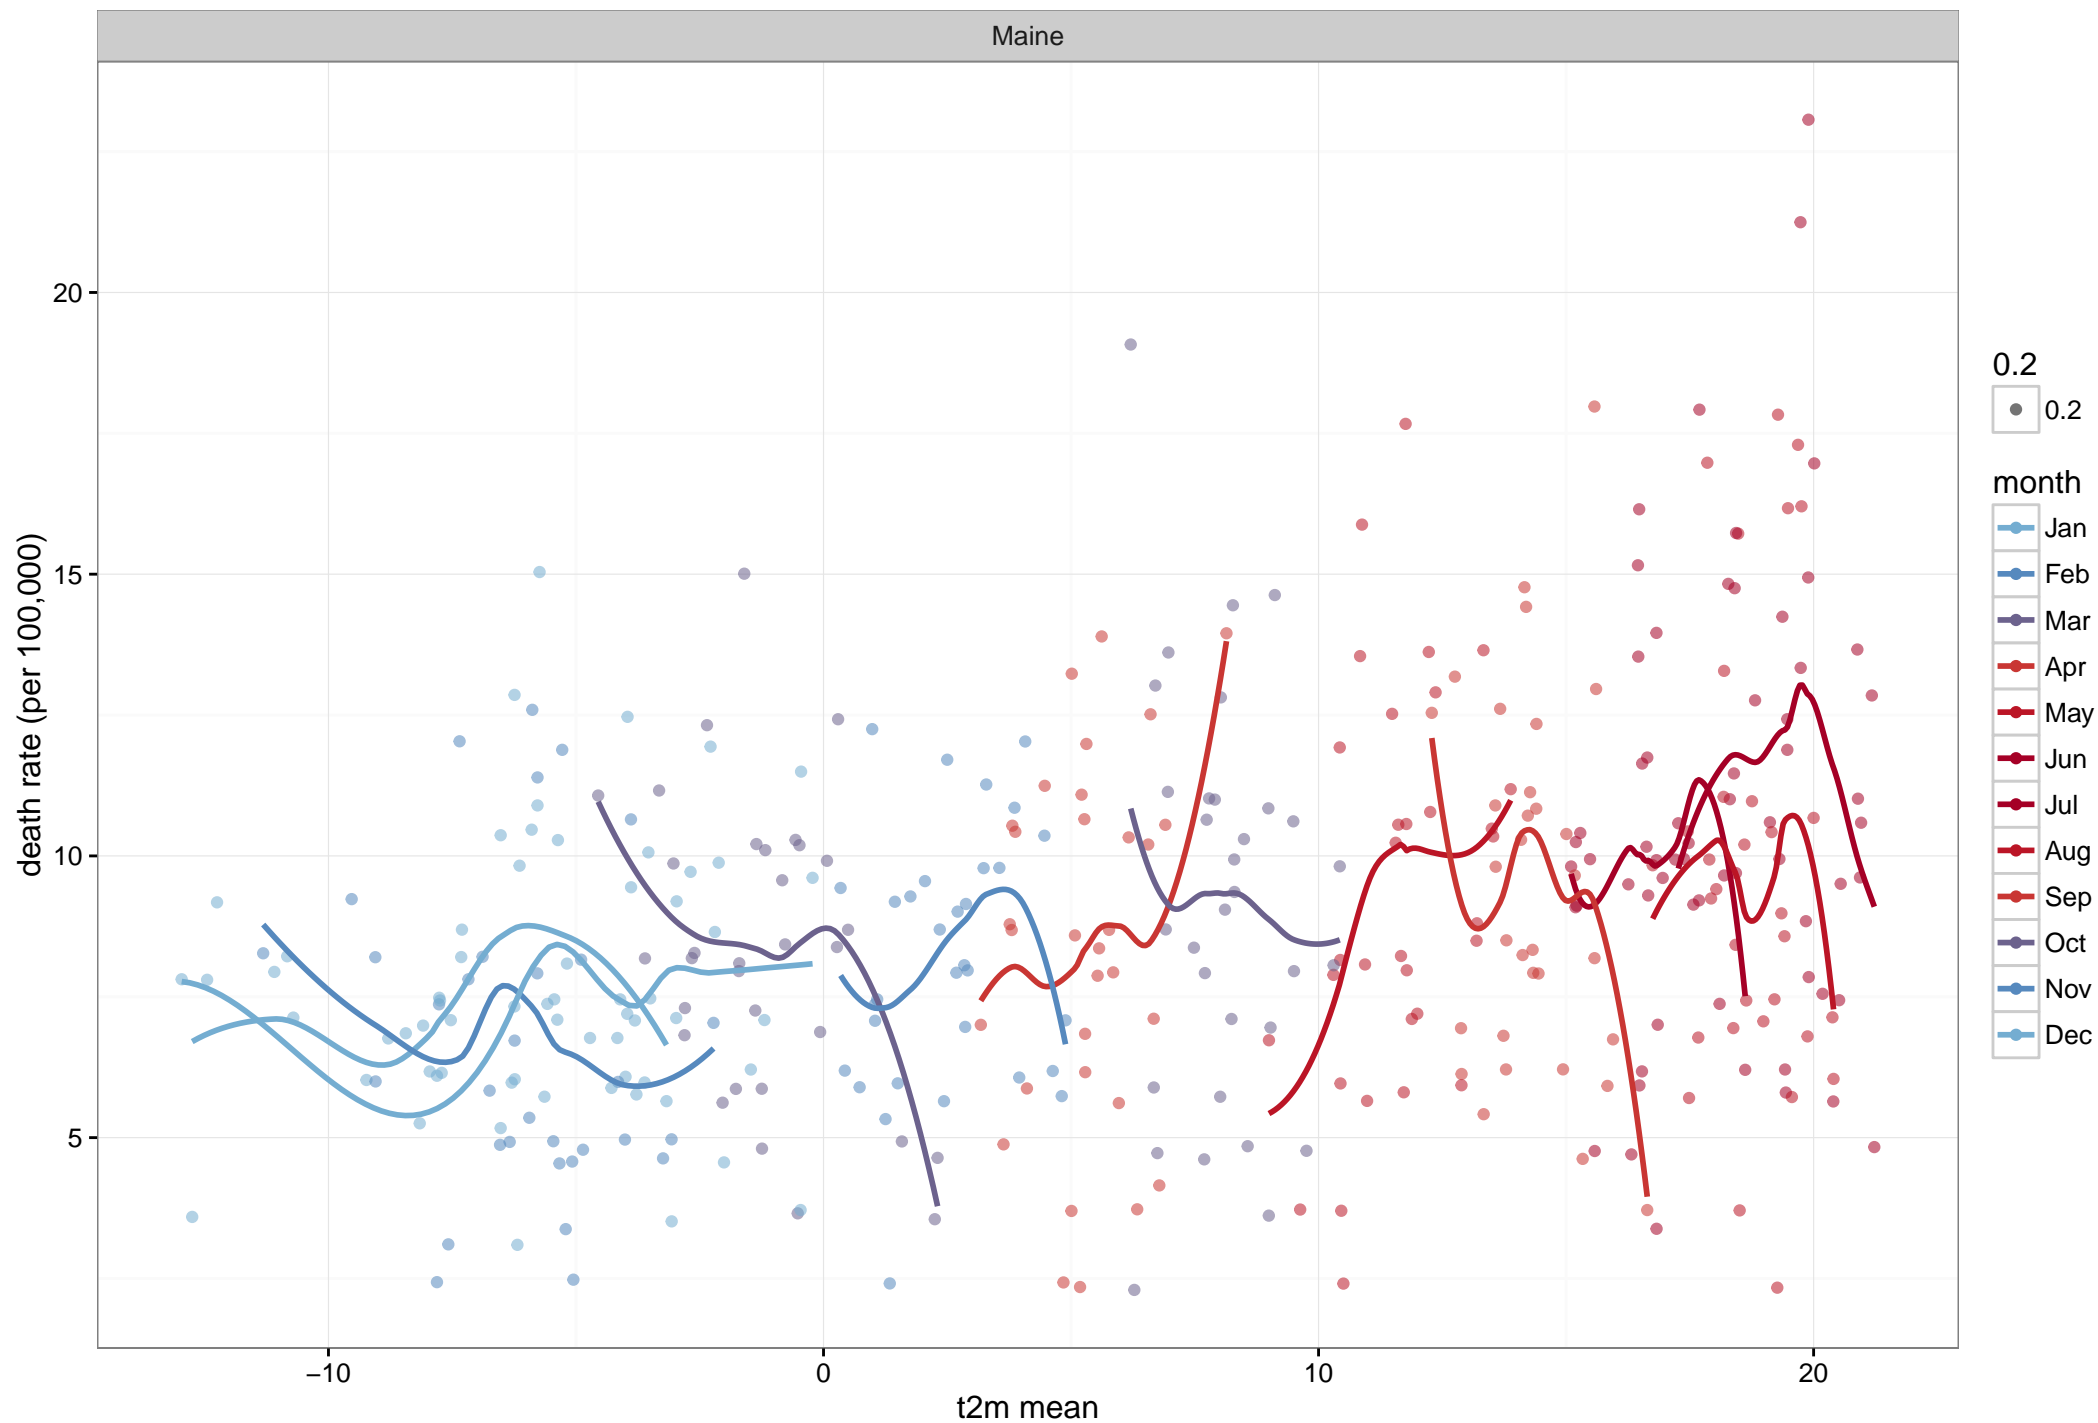

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

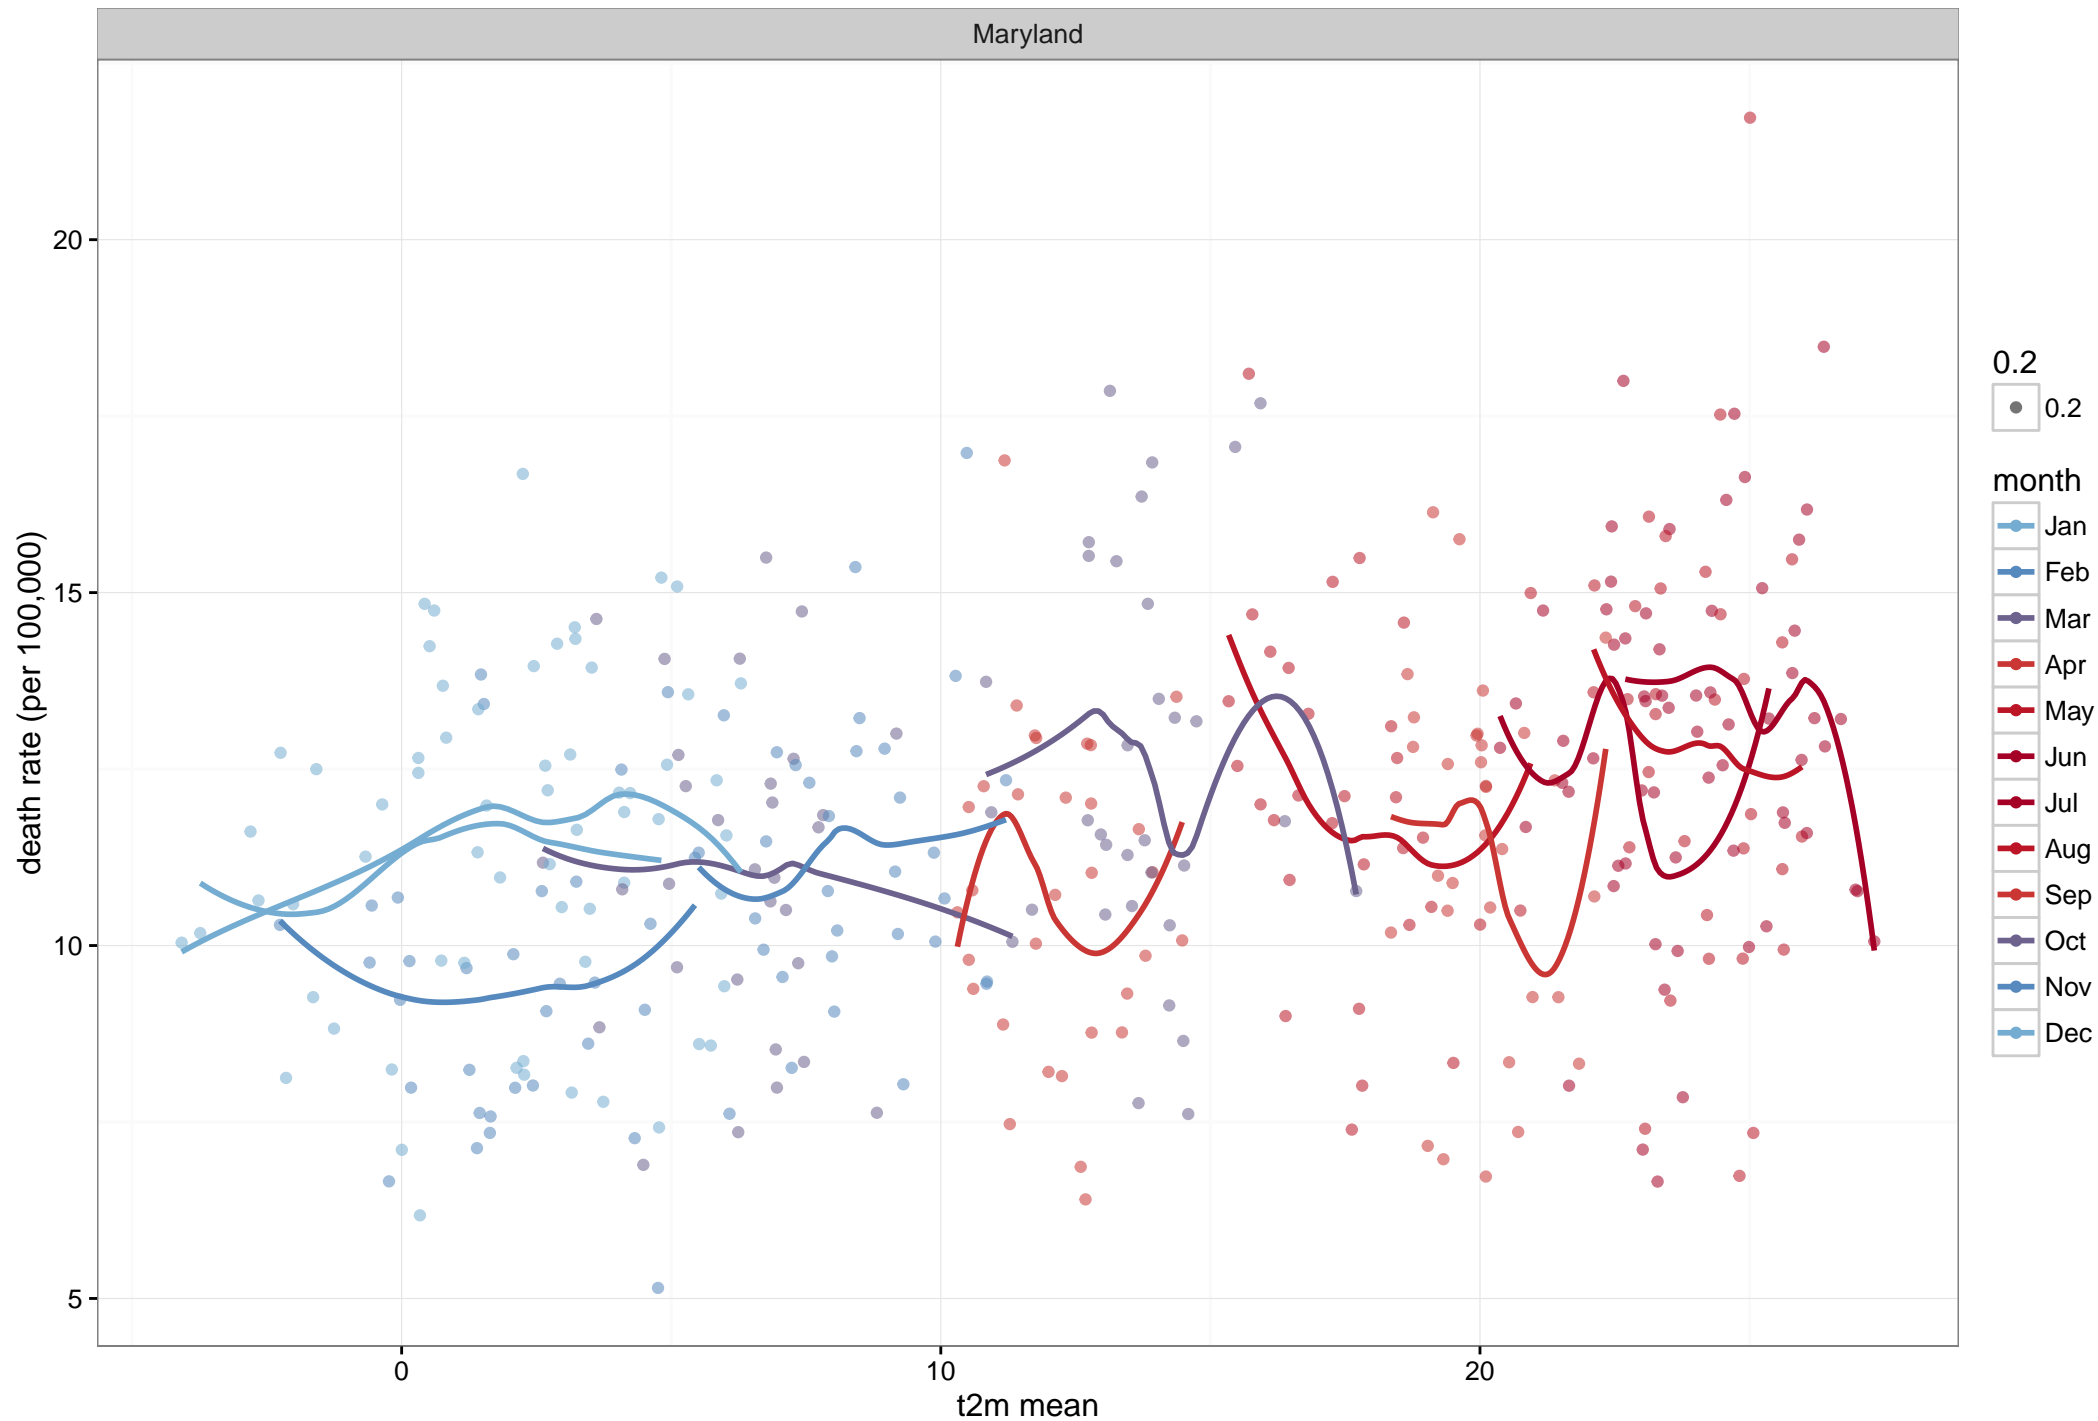

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

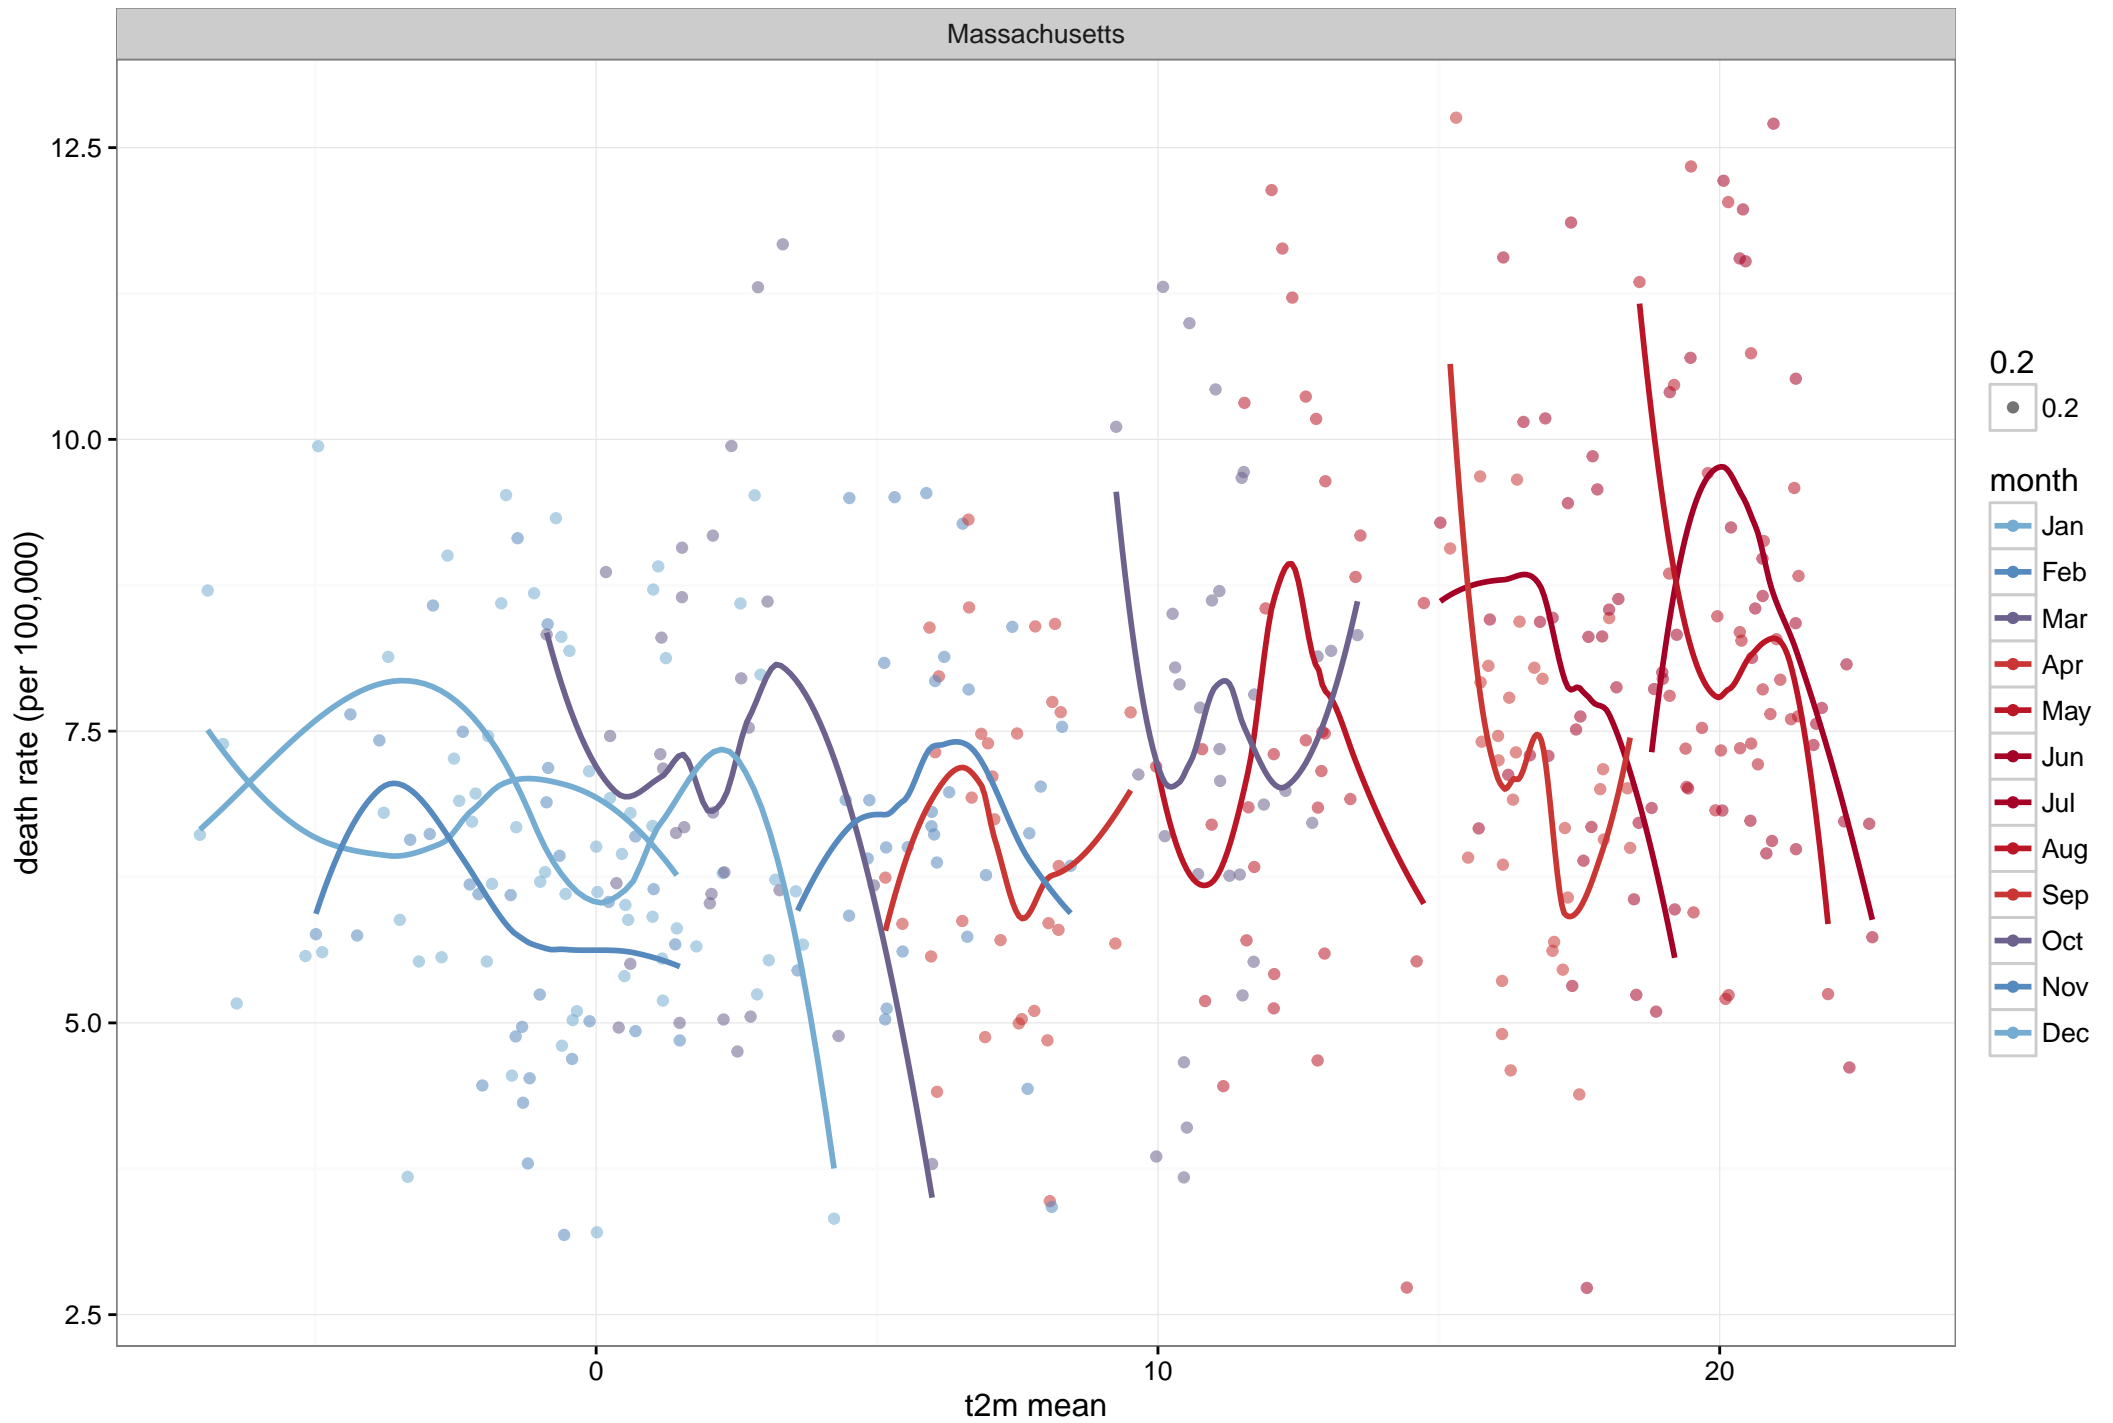

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

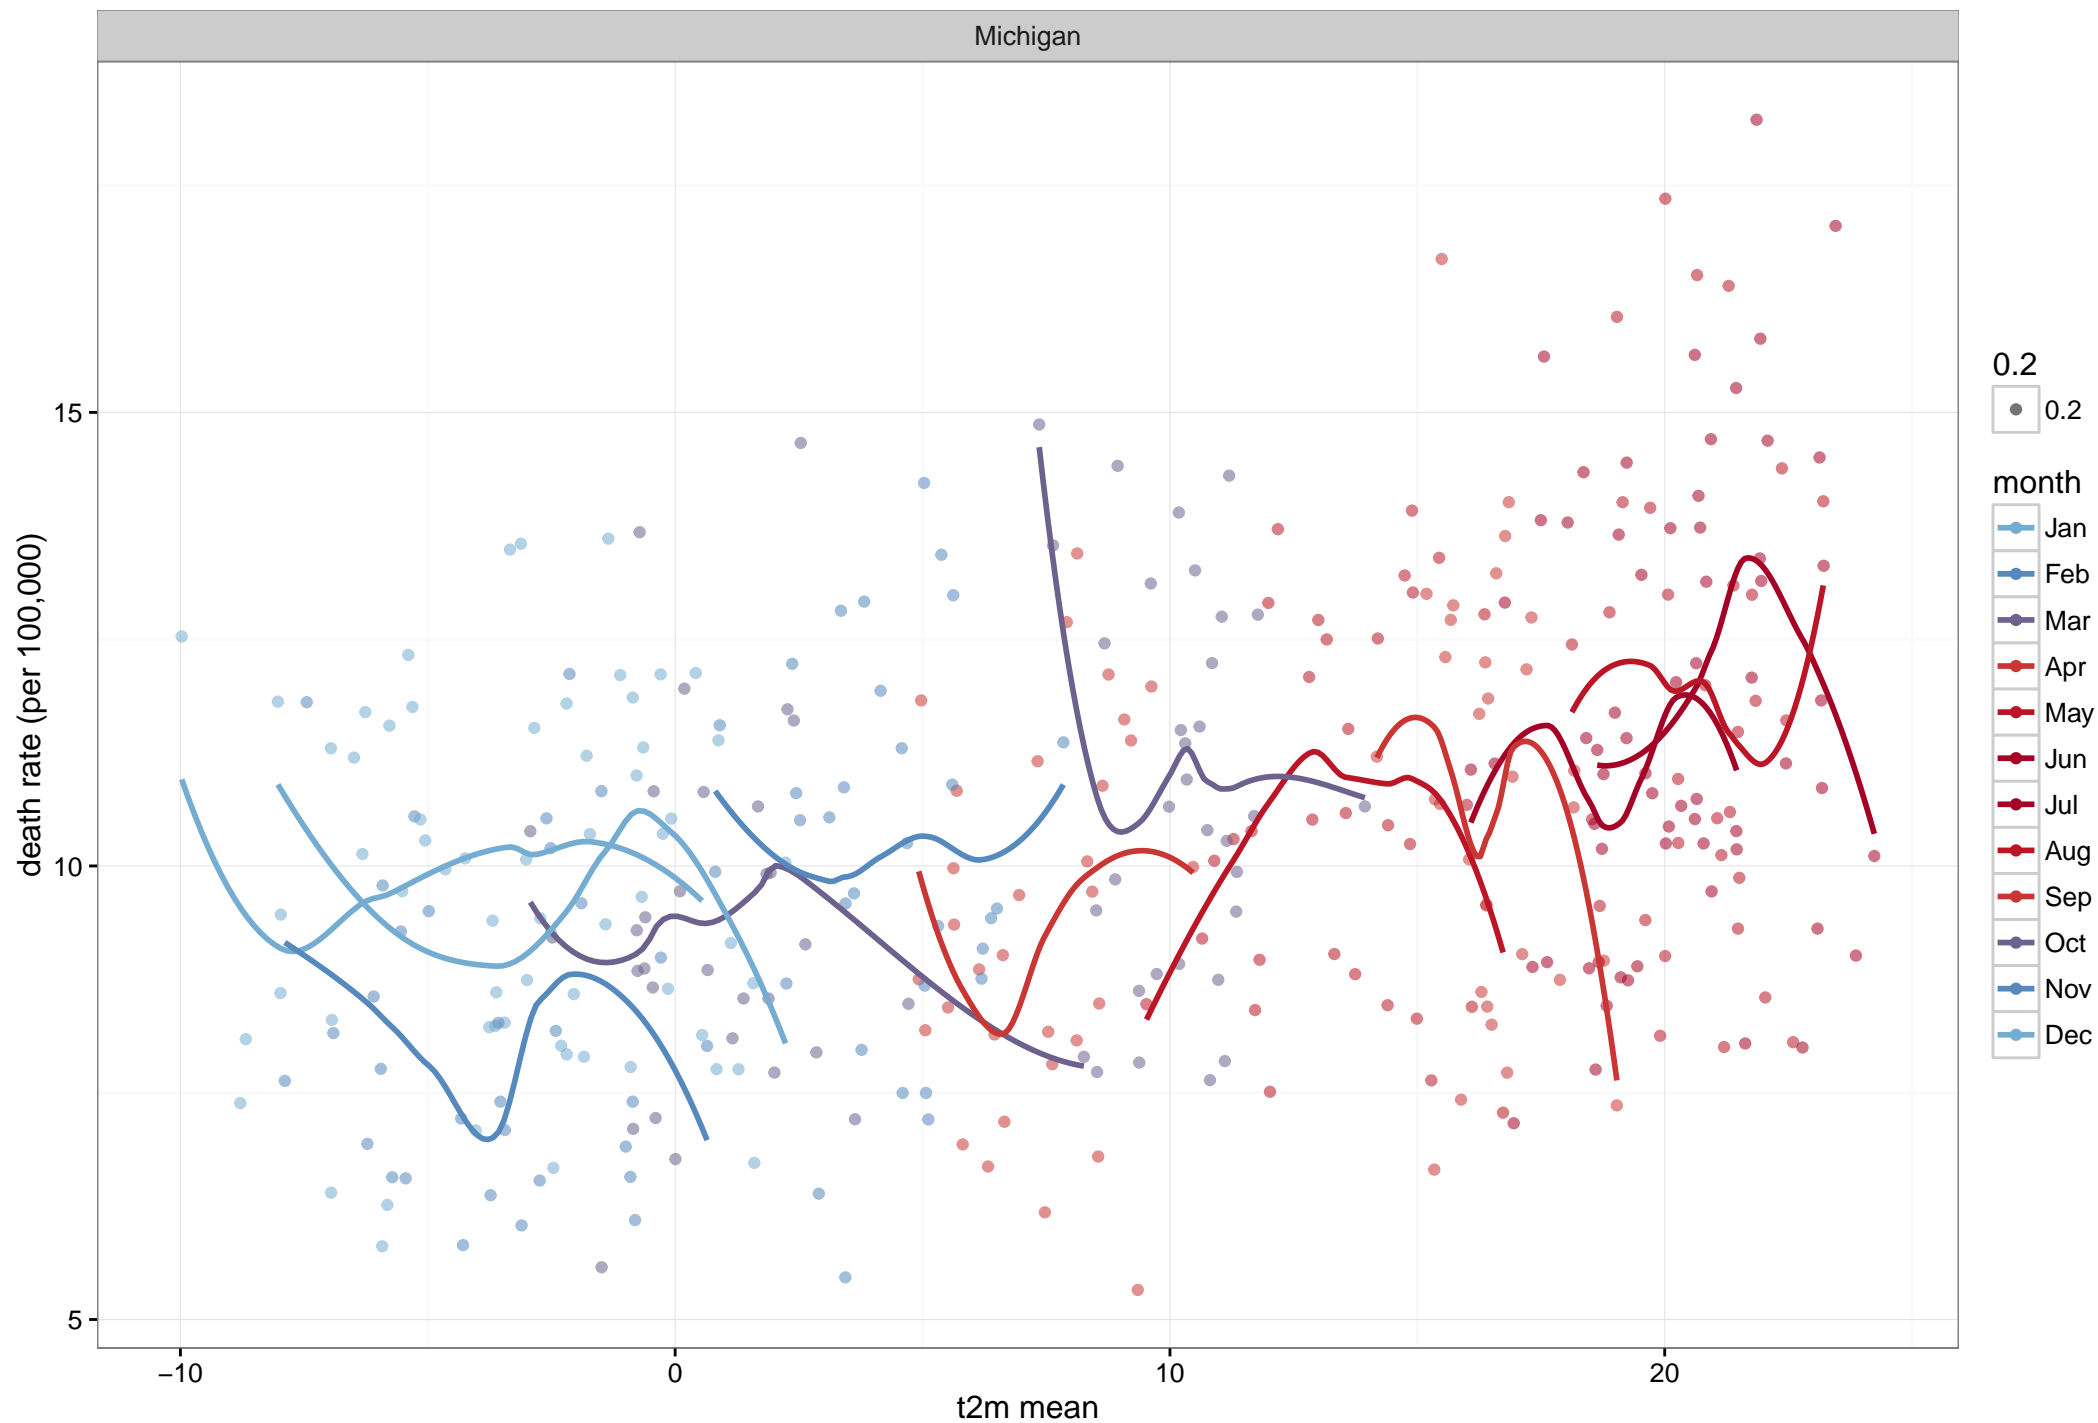

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

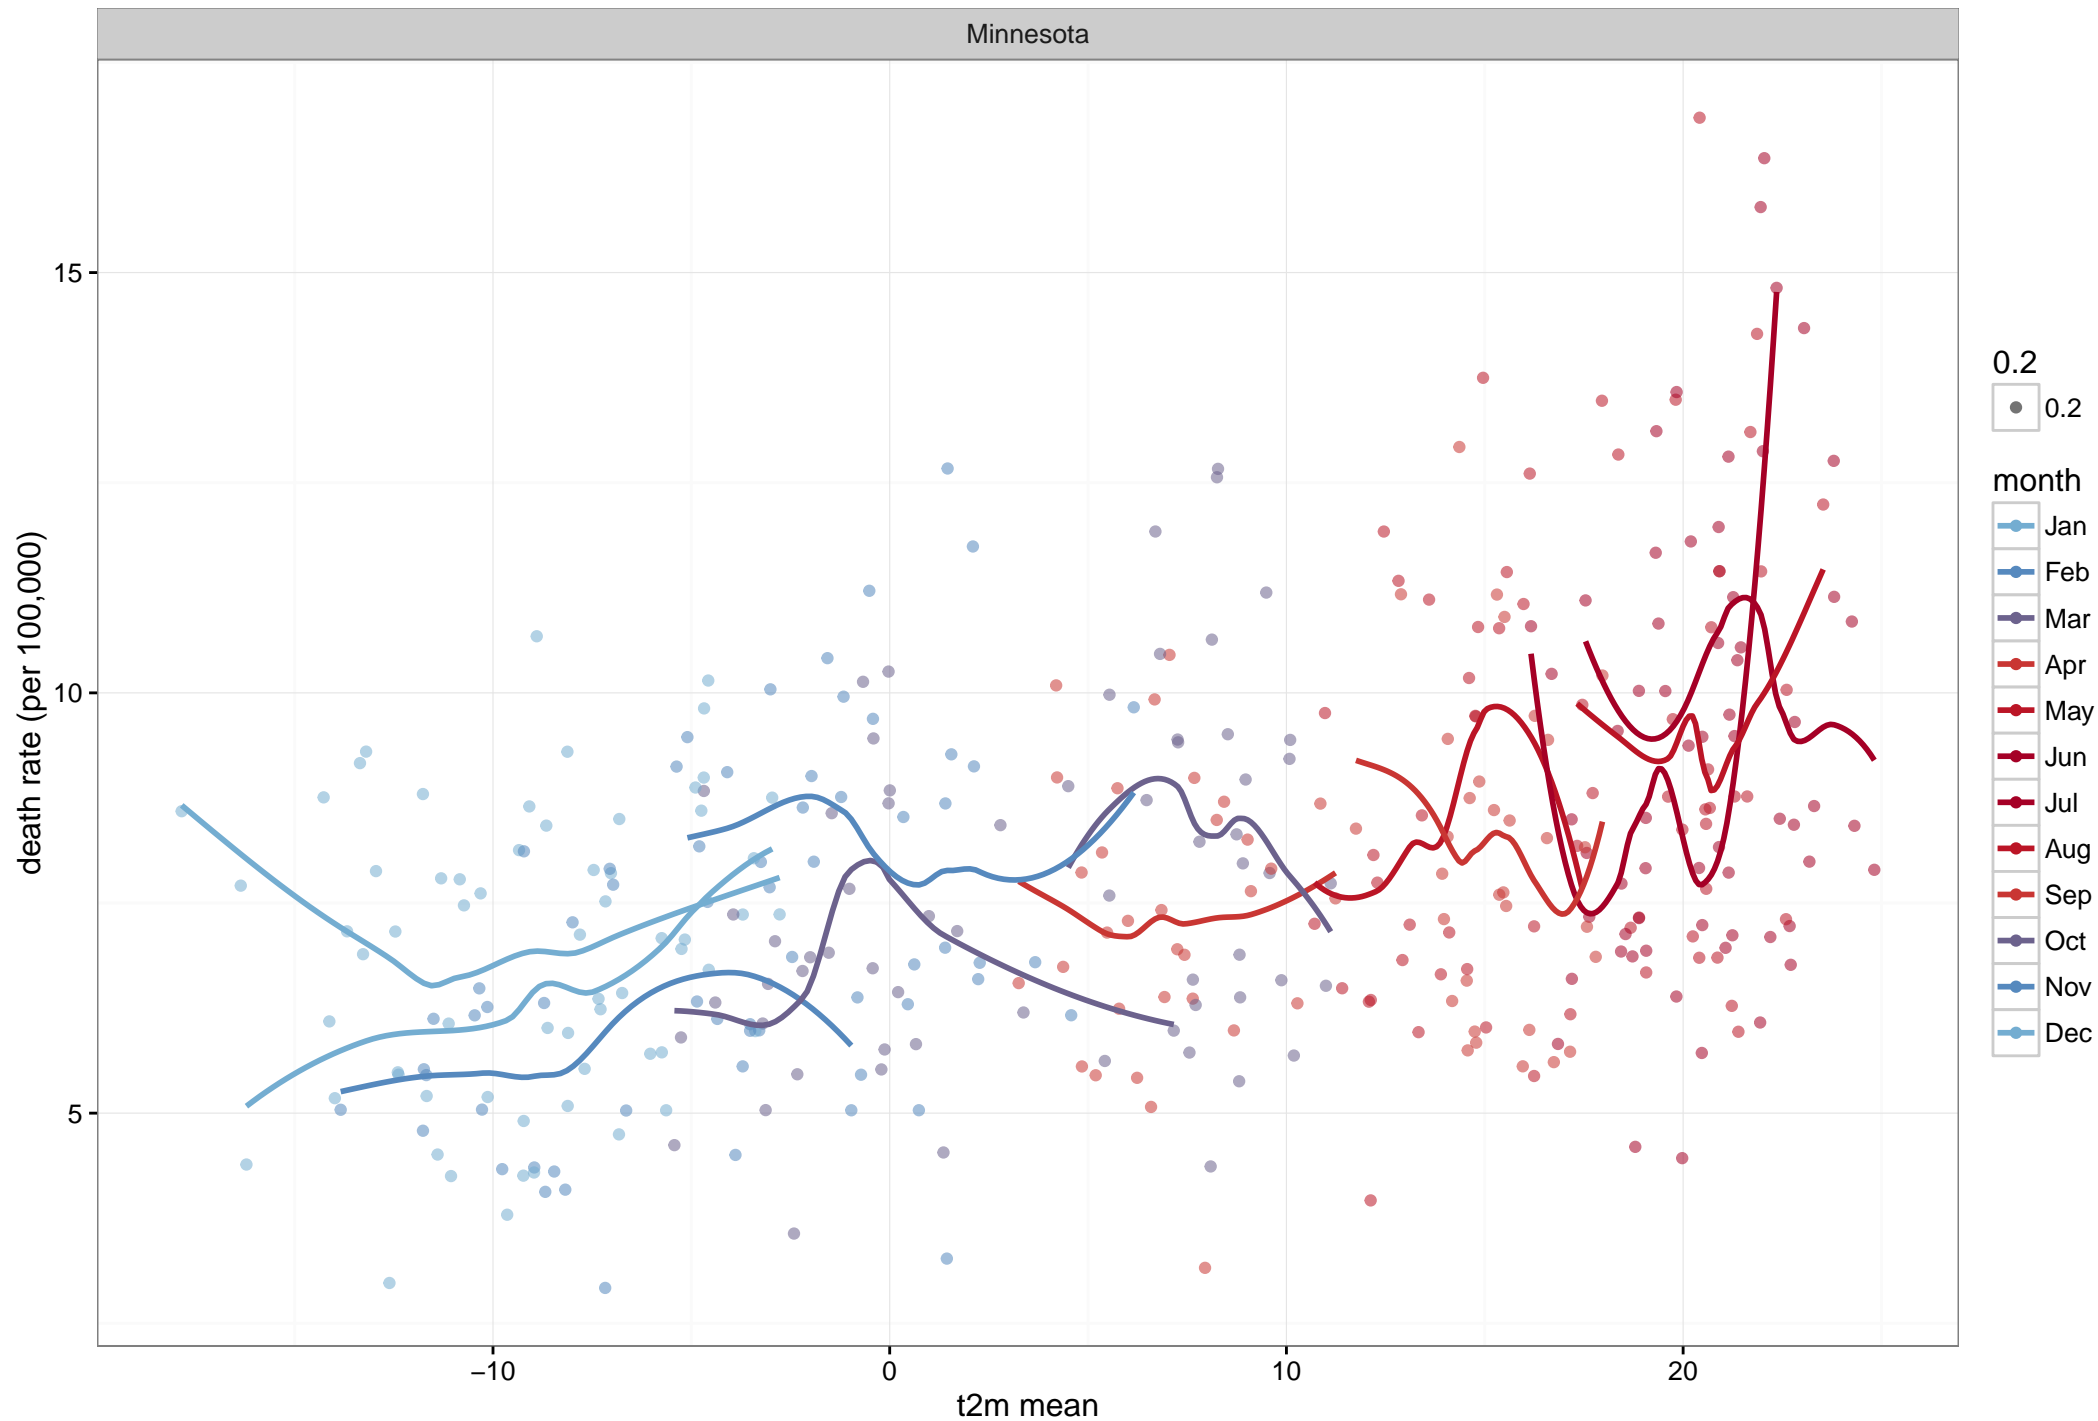

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

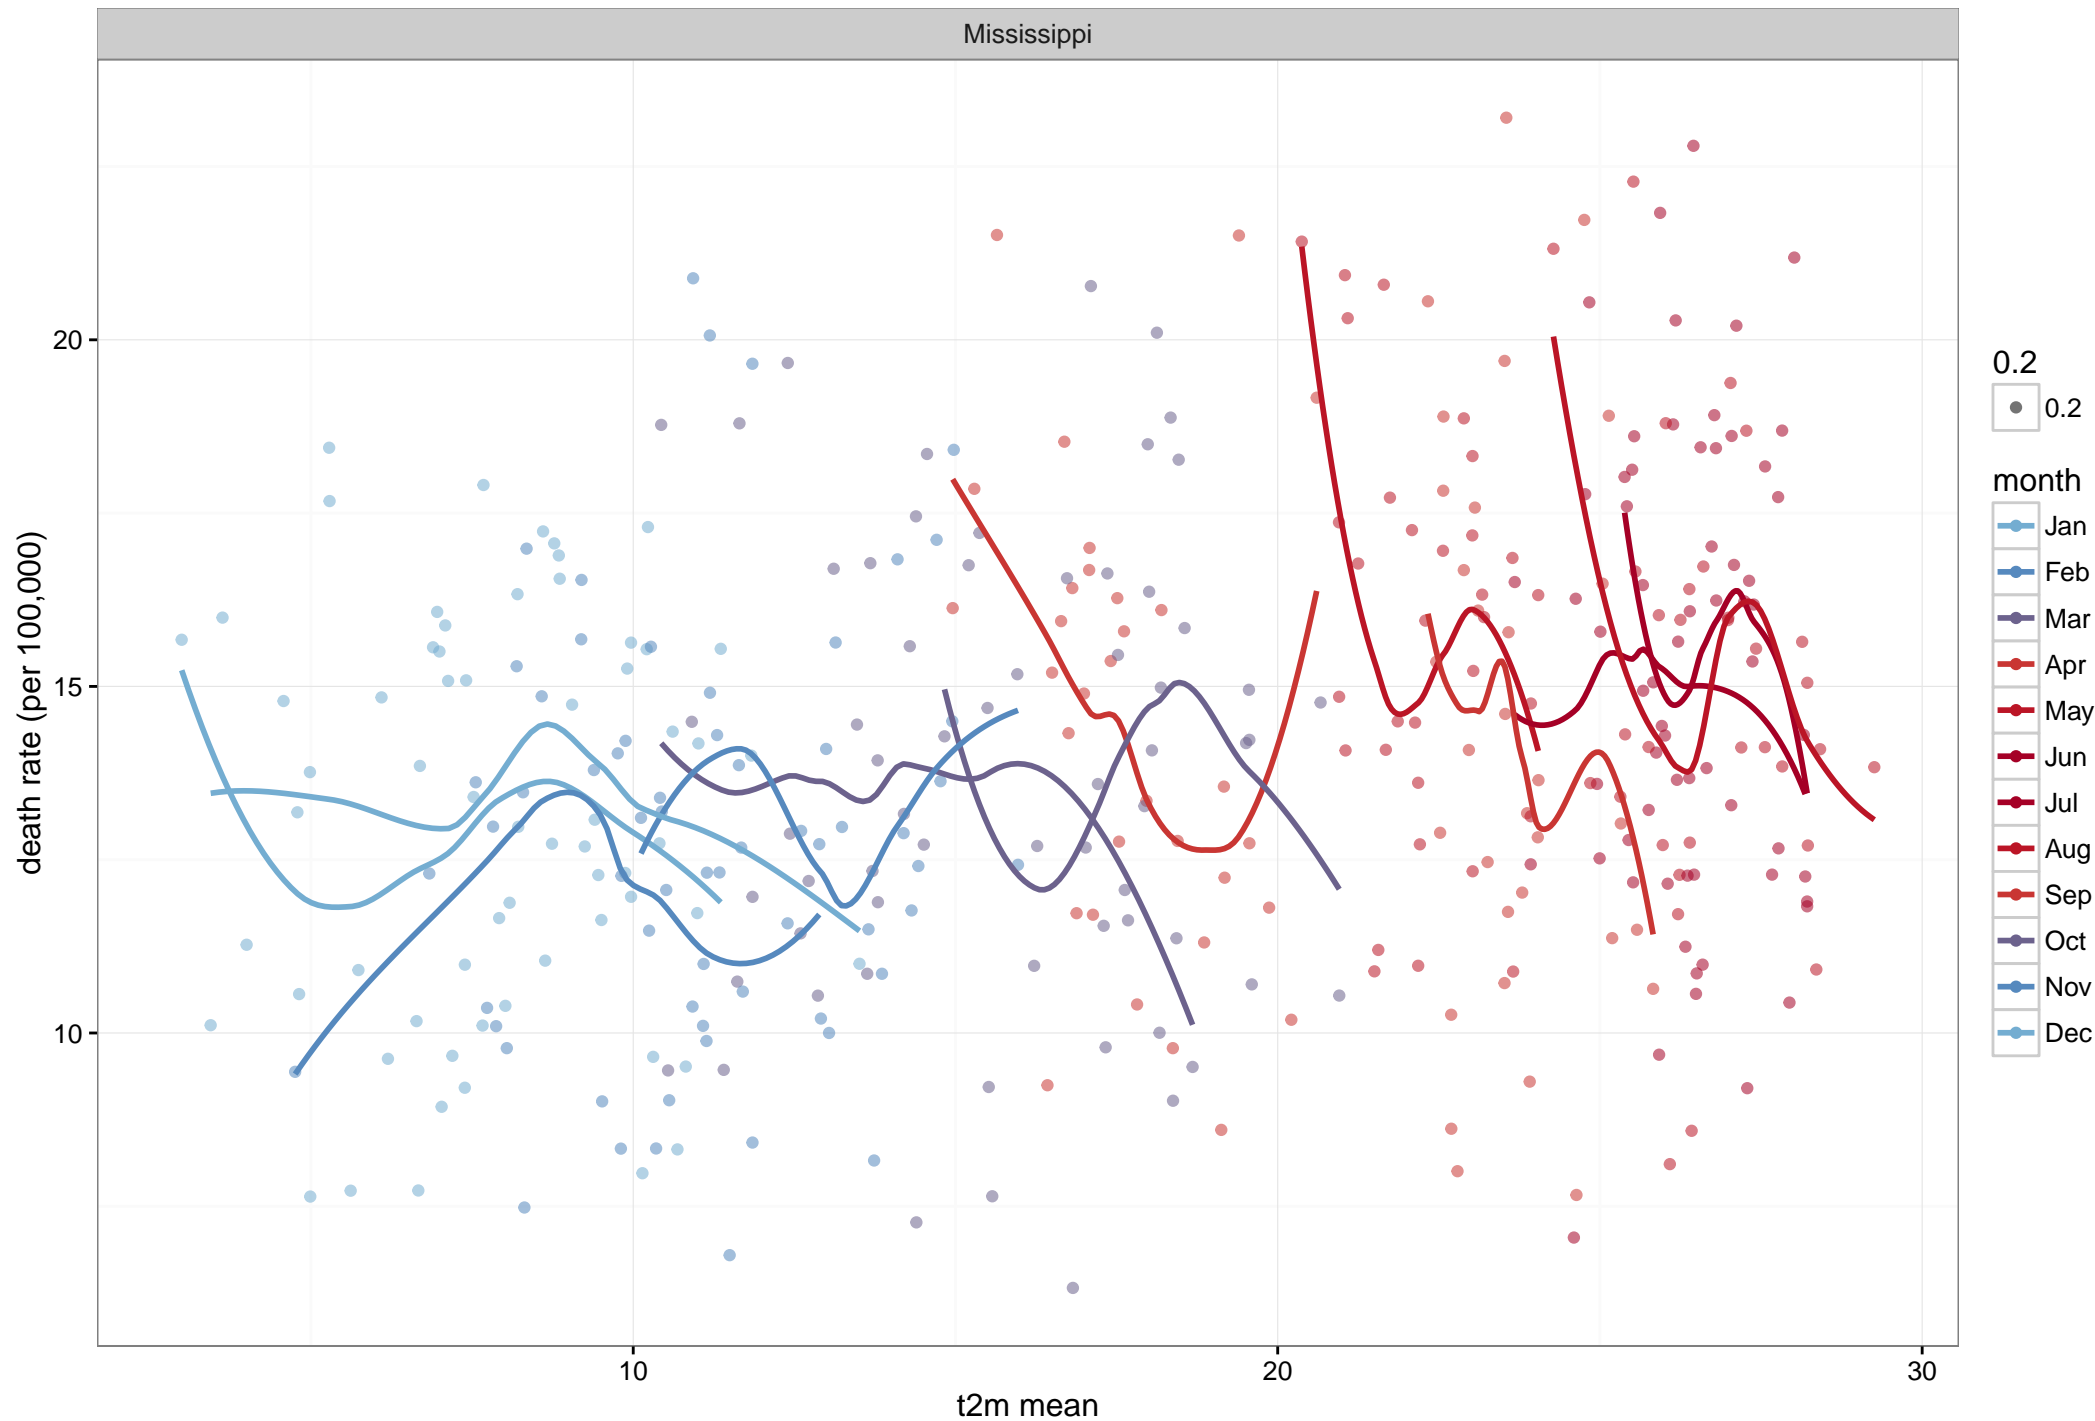

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

Death rates by state fitted by month 1982–2013 against t2m mean : male 15

This scatter plot, titled "Missouri", displays the relationship between a variable on the x-axis (ranging from approximately -5 to 30) and "t2m mean" on the y-axis (ranging from -10 to 10). The data is divided into two groups: blue points and red points. The blue points are concentrated in the lower-left region, with x-values between -5 and 10 and y-values between -5 and 5. The red points are concentrated in the upper-right region, with x-values between 10 and 30 and y-values between 0 and 10. Both groups show a non-linear, wavy trend, which is highlighted by the colored lines overlaid on the data points. The blue lines represent the trend for the blue data points, and the red lines represent the trend for the red data points. The plot includes a light gray grid for reference.
